Union Square DIF: Long-Range Forecasting

Projecting the City's fiscal health through FY27

City Staff
October 25th, 2017

Agenda

- Recap of October 11th presentation
- Long-term health of the General Fund and Water & Sewer Enterprise Funds
 - Model components and assumptions
 - Measures of fiscal health
 - Key model outputs

Where we left off...

- On October 11th the City along with RKG Associates presented:
 - DIF basics and terminology
 - The proposed Union Square DIF boundary
 - Proposed Union Square DIF infrastructure projects and costs
 - Captured increment basics and projections

The city has created a public-facing website, www.somervillema.gov/usqdif for presentation slides, supplemental information, and responses to questions during hearings.

Captured Increment vs. Debt Service

Projected DIF Debt Service by Fund

Source: FirstSouthwest, City of Somerville Financial Advisor

Main Takeaways from October 11th

- DIF is a tool that allows for favorable borrowing terms, with up to five years of interest-only payments
- Union Square infrastructure projects directly benefit at least 60% of Somerville residents
- Union Square infrastructure projects also unlock significant development in the neighborhood
- Using very conservative assumptions, projected captured increment is 1.9 to 2.5 times greater than debt service
- The administration will ultimately submit to the BOA for approval five infrastructure projects to be financed through the DIF

Forecasting Fiscal Health Through FY27

General Fund

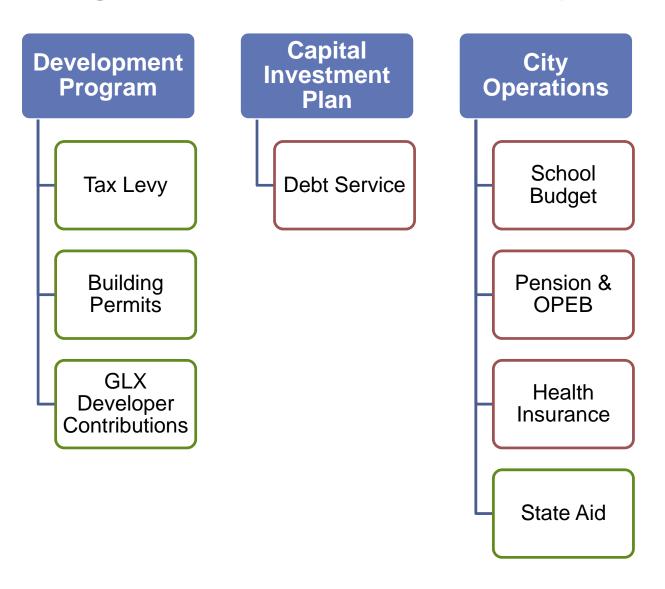

- Projected surpluses are healthy
- Debt service costs are manageable
- New growth provides flexibility

Water & Sewer Enterprise Funds

- Fund balances are high
- Debt service and anticipated MWRA costs are manageable
- Combined volumetric rate increases are in line with expectations set in FY17-FY21 rate study

General Fund Projected Budgetary Surplus FY19-FY27

General Fund Model Results: Key Metrics

According to First Southwest, a healthy General Fund in a AA-rated City is defined as having:

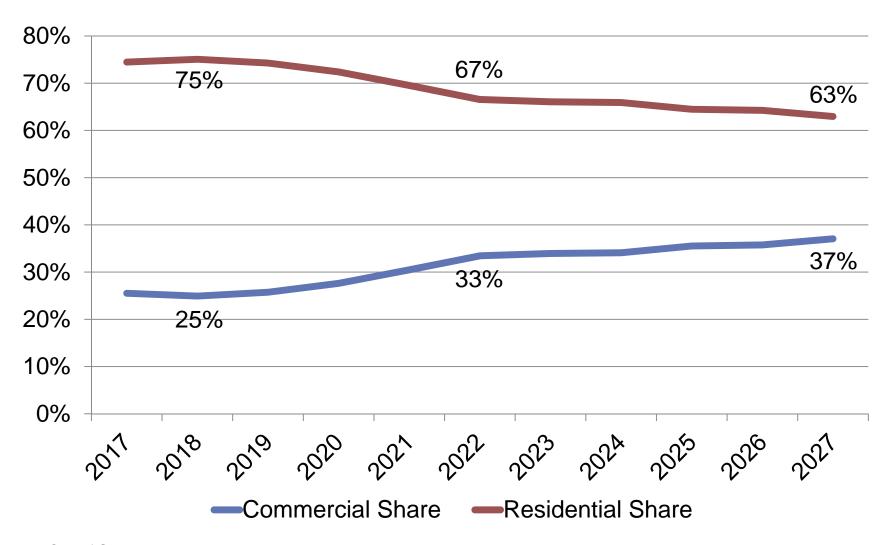

1. A ratio of revenue to expenditures between 102% and 105%

| Fiscal Year | FY19 | FY20 | FY21 | FY22 | FY23 | FY24 | FY25 | FY26 | FY27 |
|--------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| Revenue / | | | | | | | | | |
| Expenditures | 103.4% | 105.5% | 104.7% | 104.5% | 106.5% | 105.9% | 105.9% | 105.3% | 105.3% |

- 2. A ratio of debt service to expenditures between 5% and 10%
 - Less than 8% is considered "strong" by Standard & Poors

| Fiscal Year | FY19 | FY20 | FY21 | FY22 | FY23 | FY24 | FY25 | FY26 | FY27 |
|----------------|------|------|------|------|------|------|------|------|------|
| Debt Service / | | | | | | | | | |
| Revenue | 4.2% | 4.1% | 4.6% | 5.4% | 5.4% | 6.2% | 6.6% | 7.0% | 7.0% |

Potential Strategies To Mitigate

- Use of reserves to net down debt service payments
 - Use of reserves will support City Debt Financing by infusing funds into critical years to align ratios with benchmarks
 - The City can apply \$19 million of the over \$34 million already in reserves to support debt relief
 - Continue annual appropriation to GLX, High School, Street Reconstruction Stabilization Funds
 - Invest stabilization funds to get an investment return
 - Every dollar of infrastructure costs we pay in with reserves rather than borrow saves approximately \$2
 - A \$1 million reduction in principal borrowing saves taxpayers millions in interest over a 30 year time period

Potential Strategies to Mitigate

- Further development of commercial sector
 - Expand opportunity in the remaining transformative areas: Boynton, Inner Belt, Brickbottom
 - Encourage additional investment in squares & corridors: Davis and Assembly
- Further grant opportunities
- Developer contributions above and beyond GLX payments
- Sale of building assets

Forecasting Enterprise Funds

W&S Model Assumptions

 Developed by Woodard & Curran as part of the FY17-FY21 rate study and updated each fiscal year during the budget process

- Key Expenditures
 - MWRA projections
 - Debt service (based on CIP)
 - Departmental operations
- Key Revenue
 - Annual consumption estimated using 3-year rolling averages
 - New volumetric revenue projected based on development program

| Sewer | 5% | 3.0% | 4.0% |
| Combined | 3.13% | 3.13% | 3.44% |

 The model uses projected rate increases for FY22-FY27 time period set to achieve goals for debt and reserves

Volumetric Rate Projections in Context

 Future projected Water & Sewer volumetric rate increases are favorable compared to historical trends

| Average Annual Increase | | | | | | | | |
|-------------------------|-----------------------|-----------------------|--|--|--|--|--|--|
| | FY07-FY16 (actual) | FY17-FY27 (projected) | | | | | | |
| Water | 5.5% | 2.3% | | | | | | |
| Sewer | 4.6% | 3.9% | | | | | | |

Mitigating Water & Sewer Rates

- Controlling our costs
 - Capitalizing on the opportunity that the Poplar St. Pump Station affords the City to send stormwater to the Charles River as opposed to Deer Island for processing
- Using Inflow & Infiltration (I/I) Fund dollars to remove additional stormwater from our system
 - I/I contributions are projected to total \$4 million by FY27
- Subsidizing the W&S Enterprise Funds from the General Fund
