Case #: PB 2019-13
Date: July 11, 2019
Recommendation: Conditional Approval

PLANNING STAFF REPORT

Site: 114-120 Broadway

Applicant Name: GoodFood Restaurant Group, LLC
Applicant Address: 6 Azalea Road, Winchester, MA 01890
Owner Name: GoodFood Restaurant Group, LLC
Owner Address: 6 Azalea Road, Winchester, MA 01890
Agent Name: Sean O'Donovan
Agent Address: 741 Broadway, Somerville, MA 02144
Ward Councilor: Matthew McLaughlin

Legal Notice: Applicant and Owner, GoodFood Restaurant Group, LLC, seek a Special Permit with Site Plan Review (SPSR) under §5.2 of the SZO to replace a one-story building with a 5-story mixed-use building (+/- 4,000square feet ground floor retail and 39 residential units on floors 2-5). Inclusionary units provided under Article 13 of the SZO and parking relief under article 9 of the SZO. CCD45. Ward 1.

Dates of Public Hearing: Planning Board - July 11, 2019

I. PROJECT DESCRIPTION

1. **Subject Property:** The existing property consists of three parcels: 118-120 Broadway and 8 Glen Street. 118-120 Broadway is a one-story brick commercial restaurant building (East End Grille) located at the corner of Broadway and Glen Street. 8 Glen Street is a surface parking lot stretching into the block behind the existing commercial buildings facing Broadway (numbers 110, 112, and 114). 114 Broadway is a single-story, brick-fronted storefront commercial building that directly abuts 118-124 Broadway. There is a narrow alley between the two buildings. All parcels are CCD-55 zone. Street and aerial images of the project site appear below.

Top image: Street view of 114 Broadway and 118-120 Broadway
Middle image: The 8 Glenn Street parking as seen from Glen Street, behind 118-120 Broadway
Bottom image: Aerial view of the approximate project area.

2. Proposal: On August 3, 2017, the Planning Board conditionally approved a special Permit with Site Plan Review (SPSR) project that consisted of the construction of a five-to-three-story mixed-used building with 24 residential units (20 market rate, 4 inclusionary, and a .8 fractional payment), two street-front commercial spaces, 20 parking spaces and 4 bike spaces. This original project consisted of the parcels of 118-120 Broadway and 8 Glen Street.

Based on feedback from the public and city officials at the time of the last approval, during the two intervening years, the Applicant worked to acquire the abutting property at 114 Broadway. By doing so, the Applicant is able to reduce the drastic “L”-shaped appearance of the original project and create a larger building with a broader street face along Broadway. This revised proposal also provides for additional residential units, both affordable and market rate, and provide for a more robust commercial presence along this key city thoroughfare. In addition to the increased number of affordable units, the number of “family-sized” units (3-bedroom units) has increased by nine.

Since the Applicants never acted on their initial approvals and both the 114 and 118-120 Broadway buildings are currently standing.

The table below exhibits some of the core changes to the proposal that the acquisition of 114 Broadway has made feasible:

Description	Original Proposal	Current Proposal
Lot area	14,356 sf	14,548 sf
Building height	54'6"	No change
Number of stories	5 to 3	No change
Building area	32,529 sf	50,659 sf*
Studio units	0	1
One-bedroom units	6	No change
One-bedroom with study	8	13
Two-bedroom units	7	No change
Three bedroom units	3	12
Total residential units	24**	39***
Commercial space	3,000 sf (2 tenants)	3,840 sf (2-3 tenants)
Parking spaces	20	30

* This includes 4,287 sf of basement storage area.

** 20 market-rate, 4 inclusionary, 0.8 payment

*** 32 market-rate, 7 inclusionary, 0.8 payment

3. **Green Building Practices:** The application states the following: the applicant intends to explore energy efficient appliances and mechanicals and electric charging stations for electric cars.

II. FINDINGS FOR SPECIAL PERMIT WITH SITE PLAN REVIEW (SZO §5.2):

In order to grant a special permit, the SPGA must make certain findings and determinations as outlined in §5.2 of the SZO. This section of the report goes through §5.2.5 in detail.

1. **Information Supplied:**

The Staff finds that the information provided by the Applicant conforms to the requirements of §5.1.2 of the SZO and allows for a comprehensive analysis of the project with respect to the required Special Permits.

2. **Compliance with Standards: *The Applicant must comply "with such criteria or standards as may be set forth in this Ordinance which refer to the granting of the requested special permit."***

Nature of Application: CCD-55 Corridor Commercial Districts

Section 4.4.1 states that “[l]awfully existing nonconforming structures other than one- and two-family dwellings may be enlarged, extended, renovated or altered only by special permit authorized by the SPGA in accordance with the procedures of Article 5. The SPGA must find that such extension, enlargement, renovation or alteration is not substantially more detrimental to the neighborhood than the existing nonconforming building. In making the finding that the enlargement, extension, renovation or alteration will not be substantially more detrimental, the SPGA may consider, without limitation, impacts upon the following: traffic volumes, traffic congestion, adequacy of municipal water supply and sewer capacity, noise, odor, scale, on-street parking, shading, visual effects and neighborhood character.”

6.1.22.G CCD. All new developments shall meet the following standards:

1. *Penthouses and Mechanical Equipment.*

All elevator and stairwell penthouses, roof-mounted mechanical equipment (including enclosure, if any) and other similar rooftop installations shall be set back from the roof edge in accordance with the screening provisions in Section 14.3.

2. *Service Areas and Loading Spaces.*

Ground level mechanical equipment, utility and trash enclosures, loading docks and other utilitarian and service elements are located within the structure and shall be visually and acoustically screened. Access to these areas shall not interrupt pedestrian and sidewalk treatments. The hours of delivery will be limited so as to minimize any adverse impacts of the service and loading on the adjacent residential properties.

3. *Pedestrian Oriented Requirements.*

The building has been designed with separate front entrance doors, oriented to existing public sidewalks, to each retail and business space, and the residential lobby.

4. *Lighting.*

Lighting will be appropriate to the pedestrian-oriented character of surrounding neighborhoods and buildings, and shall enhance safety and security while minimizing glare and light trespass.

5. *Transition to Abutting Residential District.*

The minimum side or rear yard setback of a property abutting or spanning a residential district line (RB is abutting) shall be 20 feet from the district line with outermost 10 feet of the setback to consist exclusively of vegetative landscaping. Above the 3rd floor (35'), the building has an additional 15 foot Upper Level Setback to the portion of the building that is 5-stories.

6. *Parking Design.*

Parking and loading areas are concealed in structures, hidden from view from public ways and the adjacent residential properties. Any views into parking structures shall be minimized through use of landscaping and fencing.

7. *Payment in Lieu of Parking.*

Not applicable.

8. *Credit for Provision of Land for Public Infrastructure.*

Not applicable.

3. Purpose of District: *The Applicant has to ensure that the project "is consistent with the intent of the specific zoning district as specified in Article 6".*

The Corridor Commercial Districts (CCD) have been established to promote appropriate infill development along heavily traveled transportation corridors, especially where those corridors meet at named Squares. The district recognizes that such corridors present opportunities for an active mix of uses while also addressing development challenges posed by smaller lots and nearby existing residential development and the need to be accessible by multiple modes of transportation. The major objectives of the districts are to:

1. Encourage active mid-rise commercial and residential uses that contribute to a multi-modal-friendly street;
2. Increase commercial investment in high-profile, accessible areas including retail that is largely neighborhood-serving in multi-tenant, mixed use buildings;
3. Preserve and complement historic structures;
4. Discourage inappropriate auto-oriented, significant trip-generating uses along transit corridors; and,
5. Promote pedestrian and bicycle activity.

This proposal is conducive to items 1, 2, 4, and 5, but item 3 does not apply.

4. Site and Area Compatibility: *The Applicant has to ensure that the project "(i)s designed in a manner that is compatible with the characteristics of the built and unbuilt surrounding area, and that the scale, massing and detailing of buildings are compatible with those prevalent in the surrounding area."*
Surrounding Neighborhood:

The property is located in the middle of the Broadway commercial corridor in East Somerville. The surrounding buildings along Broadway are mostly one-story commercial

Impacts of Proposal (Design and Compatibility):

6.1.22.H. Design Guidelines for the CCDs. These guidelines provide general standards for building massing, siting and articulation. This proposal meets the guidelines to the greatest extent possible.

1. The building completes the streetwall along both Broadway and Glen Streets.
2. The massing and height of the building is articulated in a manner compatible with the physical character of the surrounding CCD district. Where it abuts the residential property at the rear, the

proposed building is reduced to 3-stories.

3. A transition in height – from 5 stories at Broadway to 3- stories at the rear of the 8 Glen parcel where the parcel abuts a residential district - is established between adjacent residential properties and the new development.
4. Commercial bays are provided at the street level, each with their own entrances. Flat facades are avoided by using projecting canopies at the entrances and recessed residential balconies on the upper floors.
5. Exterior building materials for all visible portions of the building will be high quality, durable, and aesthetically-appropriate. Final material choices and colors have been conditioned to have Planning Staff review.
6. Visible rear and side façades maintain a similar character to the front façade of the building and the intended character of the surrounding district.
7. Retail, restaurant and other pedestrian-oriented uses will be located on the ground floor with entrances to the commercial spaces on Broadway. Residential units are located on the second through fifth floors. No residential units will be located on the ground floor.
10. Residential units are of varying sizes to accommodate a range of family sizes – in both the market rate and inclusionary housing units.
11. The existing sidewalk depth does not change with this proposal and is currently approximately 18’ between the building face and the curb on Broadway.

5. Functional Design: *The project must meet “accepted standards and criteria for the functional design of facilities, structures, and site construction.”*

The project meets “accepted standards and criteria for the functional design of facilities, structures, and site construction.”

6. Impact on Public Systems: *The project will “not create adverse impacts on the public services and facilities serving the development, such as the sanitary sewer system, the storm drainage system, the public water supply, the recreational system, the street system for vehicular traffic, and the sidewalks and footpaths for pedestrian traffic.”*

The project will provide 30 on-site parking spaces for 39 residential units. Entry and exit points from the new building will be sited on Glen Street. The neighborhood can expect an increased volume of construction vehicles during the construction phase of the project. The project has been conditioned such that the Engineering Division will engage in a substantial review of this project. Due to the nature of Engineering’s oversight, they can add further conditions during their own review process.

7. Adverse environmental impacts: *The proposed use, structure or activity will not constitute an adverse impact on the surrounding area resulting from: 1) excessive noise, level of illumination, glare, dust, smoke, or vibration which are higher than levels now experienced from uses permitted in the surrounding area; 2) emission of noxious or hazardous materials or substances; 3) pollution of water ways or ground water; or 4) transmission of signals that interfere with radio or television reception.*

The proposed uses will not constitute an adverse impact on the surrounding area resulting from excessive noise, glare, dust, smoke, or vibration. The level of illumination is conditioned to be sensitive to the adjacent property owners, especially residential. There will be no emission of noxious or hazardous materials or substances, or pollution of water ways or ground water.

8. Consistency with Purposes: *The Applicant has to ensure that the project "is consistent with (1) the general purposes of this Ordinance as set forth in Article 1, and (2) the purposes, provisions, and specific objectives applicable to the requested special permit which may be set forth elsewhere in this Ordinance, such as, but not limited to, those purposes at the beginning of the various Articles."*

The proposal is consistent with the general purposes of the Ordinance as set forth under §1.2, which includes, but is not limited to promote the health, safety, and welfare of the inhabitants of the City of Somerville; to provide for and maintain the uniquely integrated structure of uses in the City; to secure safety from fire, panic and other dangers; to provide adequate light and air; to conserve the value of land and buildings; to encourage the most appropriate use of land throughout the City; to protect and promote a housing stock that can accommodate the diverse household sizes and life stages of Somerville residents at all income levels, paying particular attention to providing housing affordable to individuals and families with low and moderate incomes; and to preserve and increase the amenities of the municipality.

9. Preservation of Landform and Open Space: *The Applicant has to ensure that "the existing land form is preserved in its natural state, insofar as practicable, by minimizing grading and the erosion or stripping of steep slopes, and by maintaining man-made features that enhance the land form, such as stone walls, with minimal alteration or disruption. In addition, all open spaces should be designed and planted to enhance the attractiveness of the neighborhood. Whenever possible, the development parcel should be laid out so that some of the landscaped areas are visible to the neighborhood."*

There are no landforms or significant vegetation due to the location in an existing urban area. The 20' setback at the adjacent residential district will be planted with screening trees for the first 10' and a 6' high decorative fence.

10. Relation of Buildings to Environment: *The Applicant must ensure that "buildings are: 1) located harmoniously with the land form, vegetation and other natural features of the site; 2) compatible in scale, design and use with those buildings and designs which are visually related to the development site; 3) effectively located for solar and wind orientation for energy conservation; and 4) advantageously located for views from the building while minimizing the intrusion on views from other buildings."*

The project site is flat and is devoid of vegetation due to its location in an existing, highly built-out urban area. The massing of the proposed development steps down to 3-stories where the rear of the project site abuts a residential district.

11. Stormwater Drainage: *The Applicant must demonstrate that "special attention has been given to proper site surface drainage so that removal of surface waters will not adversely affect neighboring properties or the public storm drainage system. Storm water shall be removed from all roofs, canopies, and powered area, and routed through a well-engineered system designed with appropriate storm water management techniques. Skimming devices, oil, and grease traps, and similar*

facilities at the collection or discharge points for paved surface runoff should be used, to retain oils, greases, and particles. Surface water on all paved areas shall be collected and/or routed so that it will not obstruct the flow of vehicular or pedestrian traffic and will not create puddles in the paved area. In larger developments, where practical, the routing of runoff through sheet flow, swales or other means increasing filtration and percolation is strongly encouraged, as is use of retention or detention ponds. In instances of below grade parking (such as garages) or low lying areas prone to flooding, installation of pumps or other devices to prevent backflow through drains or catch basins may be required.”

Storm water shall be removed from all roofs, canopies, and powered areas and routed through a well-engineered system designed with appropriate storm water management techniques. Surface water on all paved areas shall be collected and/or routed so that it will not obstruct the flow of vehicular or pedestrian traffic and will not create puddles in the paved areas. This project has been conditioned such that it includes significant approval and oversight from the Engineering Division.

12. Historic or Architectural Significance: *The project must be designed “with respect to Somerville’s heritage, any action detrimental to historic structures and their architectural elements shall be discouraged insofar as is practicable, whether those structures exist on the development parcel or on adjacent properties. If there is any removal, substantial alteration or other action detrimental to buildings of historic or architectural significance, these should be minimized and new uses or the erection of new buildings should be compatible with the buildings or places of historic or architectural significance on the development parcel or on adjacent properties.”*

There is no historical significance to the existing site or structure as documented by the Historical Preservation Commission (HPC) letter dated October 25, 2016. The proposed building uses brick at the storefront and as architectural bays on all elevations. This is in keeping with typical commercial storefronts found along Broadway and throughout the City.

13. Enhancement of Appearance: *The Applicant must demonstrate that “the natural character and appearance of the City is enhanced. Awareness of the existence of a development, particularly a non-residential development or a higher density residential development, should be minimized by screening views of the development from nearby streets, residential neighborhoods of City property by the effective use of existing land forms, or alteration thereto, such as berms, and by existing vegetation or supplemental planting.”*

The redevelopment of the site to include a mixed-use multi-story building will be a significant improvement to the City over the existing two single-story buildings and asphalt surface parking lot. The massing of the proposed building steps down at the rear where the building approached the abutting residential zone. A 10-foot planted buffer and a fence will be installed between the rear of the new building and the abutting property on Glen Street in order to help obscure views of surface-level building components

14. Lighting: *With respect to lighting, the Applicant must ensure that “all exterior spaces and interior public and semi-public spaces shall be adequately lit and designed as much as possible to allow for surveillance by neighbors and passersby.”*

All exterior spaces and interior public and semi-public spaces shall be adequately lit and designed as much as possible to allow for surveillance by neighbors and passersby. However, all lighting has been conditioned to be constrained to the site.

15. Emergency Access: *The Applicant must ensure that “there is easy access to buildings, and the grounds adjoining them, for operations by fire, police, medical and other emergency personnel and equipment.”*

For the original project, Fire Prevention required a walkway along the side/rear of the building, paralleling Broadway near the abutting residential property. Staff is requiring this for this updated proposal as well. A condition has been added requiring an updated landscaping plan to be provided to Planning Staff prior to the issuance of a Building Permit showing this walkway in relation to the planted buffer and rear fence.

16. Location of Access: *The Applicant must ensure that “the location of intersections of access drives with the City arterial or collector streets minimizes traffic congestion.”*

The garage entrance is accessed from Glen Street and removed from Broadway, the arterial, a distance of approximately 97’.

17. Utility Service: *The Applicant must ensure that “electric, telephone, cable TV and other such lines and equipment are placed underground from the source or connection, or are effectively screened from public view.”*

All the utility rooms are located in the basement. As the adjacent properties facing Broadway are currently served with utility service under the surface parking lot, an easement plan will need to be prepared showing the crossing of private property and an agreement for rights to access the garage for repair, maintenance, or upgrade of those utilities.

The transformer, located on the Glen Street side of the building, has been conditioned to be screened with a decorative wrapping and/or plantings in consultation with Planning Staff, and to the extent possible allowed by code.

18. Prevention of Adverse Impacts: *The Applicant must demonstrate that “provisions have been made to prevent or minimize any detrimental effect on adjoining premises, and the general neighborhood, including, (1) minimizing any adverse impact from new hard surface ground cover, or machinery which emits heat, vapor, light or fumes; and (2) preventing adverse impacts to light, air and noise, wind and temperature levels in the immediate vicinity of the proposed development.;*”

The original design was modified multiple times based on community feedback. The updated design incorporates a longer street façade than the original proposal, but is consistent with the overall design of the originally-approved project. The current design allows for additional building bulk away from the corner of Broadway and Glen and, therefore, allows the applicant to accommodate a more robust commercial space and more inclusionary residential units.

19. Signage: *The Applicant must ensure that “the size, location, design, color, texture, lighting and materials of all permanent signs and outdoor advertising structures or features shall reflect the scale and character of the proposed buildings.”*

Signage is conditioned to be mounted within the sign band at the ground floor storefront on Broadway and above the residential entrance on Glen Street (above the doors and windows) and limited to lettering only. Any additional signage will be required to apply for a Special Permit.

20. Screening of Service Facilities: *The Applicant must ensure that “exposed transformers and other machinery, storage, service and truck loading areas, dumpsters, utility buildings, and similar structures shall be effectively screened by plantings or other screening methods so that they are not directly visible from either the proposed development or the surrounding properties.”*

Trash and service access for the commercial and residential uses will occur in the garage under building. This will be screened from the view of the adjacent residential building at the rear of the site by a decorative fence and a 10-foot planted buffer. Only the transformer is located at the street as required by code for access but will be screened with plantings to the extent allowable and/or wrapped as conditioned. Trash and recycling serves have been conditioned to be executed by a private contractor.

21. Screening of Parking:

Parking occurs within and under the building. The garage door is located on Glen Street and all parking will be obscured by the same installation that screens the service facilities.

21. Housing Impact: *Will not create adverse impacts on the stock of existing affordable housing.* This project improves the supply of affordable unit and will, therefore, have no adverse impacts. Per Table 13.3.4.A, the total of 39 units require 20% inclusionary which means that 7 new units will be provided plus a cash payment of 0.8 units per Section 13.4.

22. SomerVision Plan: *Complies with the applicable goals, policies and actions of the SomerVision plan, including the following, as appropriate: Preserve and enhance the character of Somerville’s neighborhoods, transform key opportunity areas, preserve and expand an integrated, balanced mix of safe, affordable and environmentally sound rental and homeownership units for households of all sizes and types from diverse social and economic groups; and, make Somerville a regional employment center with a mix of diverse and high-quality jobs. The areas in the SomerVision map that are designated as enhance and transform should most significantly contribute towards the SomerVision goals that are outlined in the table below. The areas marked as conserve are not expected to greatly increase the figures in the table since these areas are not intended for large scale change.*

<u>SomerVision Summary</u>	<u>Existing</u>	<u>Proposed</u>
<i>Dwelling Units:</i>	0	39
<i>Affordable Units:</i>	0	7 (+ 0.8 fractional payment)
<i>Commercial Sq. Ft.:</i>	9405sf	3,840sf
<i>Estimated Employment:</i>	unknown	unknown
<i>Parking Spaces:</i>	26	30
<i>Publicly Accessible Open Space:</i>	none	none

24. Impact on Affordable Housing:

The project will provide 7 units of inclusionary housing and a fractional payment of 0.8 into the Somerville Affordable Housing Trust Fund. These to aspects of housing affordability have been added as conditions of approval.

III. RECOMMENDATION

Special Permit with Site Plan Review under §5.2

Based on the materials submitted by the Applicant, the above findings and subject to the following conditions, the Planning Staff recommends **CONDITIONAL APPROVAL** of the requested **SPECIAL PERMIT WITH SITE PLAN REVIEW**.

The recommendation is based upon a technical analysis by Planning Staff of the application material based upon the required findings of the Somerville Zoning Ordinance, and is based only upon information submitted prior to the public hearing. This report may be revised or updated with new recommendations, findings and/or conditions based upon additional information provided to the Planning Staff during the public hearing process.

#	Condition	Timeframe for Compliance	Verified (initial)	Notes
---	-----------	--------------------------------	-----------------------	-------

1	Approval is for the new 3- and 5- story mixed-use building with 39 residential units and 2-3 commercial spaces. 7 inclusionary units and a 0.8 fractional payment shall be provided. 30 on-site parking spaces provided. This approval is based upon the following application materials and the plans submitted by the Applicant:	BP/CO	ISD/ Planning											
	<table border="1"> <thead> <tr> <th>Date</th> <th>Submission</th> </tr> </thead> <tbody> <tr> <td>March 28, 2019</td> <td>Application materials submitted to OSPCD</td> </tr> <tr> <td></td> <td></td> </tr> <tr> <td>June 6, 2019</td> <td>Statement of changes received by OSPCD</td> </tr> <tr> <td></td> <td></td> </tr> </tbody> </table>				Date	Submission	March 28, 2019	Application materials submitted to OSPCD			June 6, 2019	Statement of changes received by OSPCD		
	Date				Submission									
	March 28, 2019				Application materials submitted to OSPCD									
June 6, 2019	Statement of changes received by OSPCD													
Any changes to the approved plans and elevations that are not <i>de minimis</i> must receive SPGA approval.														
Affordable Housing/Linkage														
2	Affordable Housing Implementation Plan (AHIP) shall be approved by the OSPCD Housing Division and executed prior to issuance of Building Permit. Affordable units shall be provided on-site.	BP	Housing											
3	Written certification of the creation of affordable housing units, any fractional payment required, or alternative methods of compliance, shall be obtained from the OSPCD Housing Division before the issuance of a Certificate of Occupancy (C.O.). No C.O. shall be issued until the OSPCD Housing Division has confirmed that the Affordable Housing Restriction has been approved and recorded and the developer has provided the promised affordable units on-site.	CO	Housing											
4	No Certificate of Occupancy shall be issued until the OSPCD Housing Division has confirmed that: (for Condominium Projects) the Condominium Documents have been approved and the Developer has agreed to a form of Deed Rider for the Affordable Unit(s), or (for Rental Projects) the Developer has agreed to and executed a Memorandum of Understanding for Monitoring of the Affordable Unit(s).	CO	Housing											
5	Linkage payments shall be required to be paid to the Somerville Housing Trust Fund before a CO is issued.	CO	Planning											
Pre-Construction														
6	The Applicant shall contact the Engineering Department to obtain a street address prior to a building permit being issued.	BP	Engineering											
7	The proposed basement finished floor elevation shall not be less than is 1 foot above the Seasonal High Ground Water elevation. The seasonal high ground water elevation shall be determined by a Massachusetts certified soil evaluator and stated on a signed soil test pit log.	BP	Engineering											

8	The Applicant shall complete the Site Plan Review Checklist and supply the information to the Engineering Office. The plans must comply with the City's Stormwater Management Policy.	BP	Engineering	
9	The Applicant shall submit a proposed drainage report, stamped by a registered PE in Massachusetts that demonstrates compliance with the City's stormwater policy.	BP	Engineering	
10	A detailed plan shall be prepared to DPW's specifications and approved by the Engineering Department showing the utility access easements for the services that transverse the proposed garage to serve other properties. Agreements shall be signed by the affected property owners prior to issuance of Building Permit.	BP	Engineering	
11	The Applicant shall contact the Engineering Department to coordinate the timeline for cutting or opening the street and/or sidewalk for utility connections or other construction. There is a moratorium on opening streets from November 1st to April 1st and there is a list of streets that have additional opening restrictions.	BP	Engineering	
12	New sanitary connection flows over 2,000 GPD require a removal of infiltration and/or inflow by the Applicant. This will be achieved by submitting a mitigation payment, established by the City Engineers Office, to the City based on the cost per gallon of I/I to be removed from the sewer system and a removal ratio of 4:1. If a different ratio of removal or mitigation payment amount is adopted by the Board of Aldermen prior to the Applicant receiving a Certificate of Occupancy, payment will be adjusted to the BOA rate. The Applicant shall work with Engineering and meet this condition before a certificate of occupancy is issued.	BP	Engineering	
13	The applicant must comply with the: "Policy for new connections to and modifications to existing connections to the municipal sewer and drainage system stormwater management and infiltration/inflow mitigation." The Applicant shall work with Engineering to meet this condition and provide the required fees/mitigation.	CO	Eng.	
14	The Applicant shall develop a demolition plan in consultation with the City of Somerville Inspectional Services Division. Full compliance with proper demolition procedures shall be required, including timely advance notification to abutters of demolition date and timing, good rodent control measures (i.e. rodent baiting), minimization of dust, noise, odor, and debris outfall, and sensitivity to existing landscaping on adjacent sites.	Demolition Permitting	ISD	
Construction Impacts				
15	The Applicant shall post the name and phone number of the general contractor at the site entrance where it is visible to people passing by.	During Construction	Planning	
16	Approval is subject to the Applicant's and/or successor's right, title and interest in the property.	Continuous	Planning	Deed submitted & application formed signed

17	The Applicant shall, at their expense, replace any existing equipment (including, but not limited to street sign poles, signs, traffic signal poles, traffic signal equipment, wheel chair ramps, granite curbing, etc) and the entire sidewalk immediately abutting the subject property if damaged as a result of construction activity. All new sidewalks and driveways must be constructed to DPW standard.	CO	DPW	
18	All construction materials and equipment shall be stored onsite. If occupancy of the street layout is required, such occupancy must be in conformance with the requirements of the Manual on Uniform Traffic Control Devices and the prior approval of the Traffic and Parking Department must be obtained.	During Construction	T&P	
Design				
19	Applicant shall provide final material samples for siding, trim, windows, and doors to Planning Staff through the Zoning Review Planner for review and approval prior to construction. <u>The exterior materials shall be full dimensional architectural face brick (not thin brick veneer) and cementitious siding and/or panels with fenestration and trim details appropriate to traditional construction techniques.</u>	BP	Planning	
Site				
20	Landscaping shall be installed and maintained in compliance with the American Nurserymen's Association Standards;	Perpetual	Planning/ ISD	
21	There shall be a minimum of one tree for each 1,000 sf of required landscaped area under SZO §10.3.	Perpetual	Planning/ ISD	
22	The electric, telephone, cable TV and other such lines and equipment shall be placed underground from the source or connection. The utilities plan shall be supplied to the Wiring Inspector before installation.	Installation of Utilities	Wiring Inspector	
23	All new sidewalks shall be installed by the Applicant in accordance with the specifications of the Highway Superintendent. Specifically, all driveway aprons shall be concrete;	CO	Planning	
24	Snow plowed from the development shall be limited to the on-site storage area as shown on Landscape Plan (sheet C-8)	Perpetual	ISD	
Traffic & Parking				
25	Parking areas will be screened from view at the ground level by specified fences and planting, with the planting remaining effective all year (evergreen).	Perpetual	ISD	
26	Handicapped parking spaces must be sited such that they are the closest spaces to the main stairwell/elevator	Perpetual	ISD/Plng	
Miscellaneous				
27	The Applicant, its successors and/or assigns, shall be responsible for maintenance of both the building and all on-site amenities, including landscaping, fencing, lighting, parking areas and storm water systems, ensuring they are clean, well kept and in good and safe working order.	Perpetual	ISD	
28	All trash and recycling shall be stored in/under the building and shall be removed from the site by a private contractor.	Perpetual	ISD	

29	The Applicant shall submit a revised Landscape Plan showing details to the curb, maximizing the dimensions of overall sidewalk and clear walkway width, the location of street trees, and permeable pavers in place of planting at the easement with 114 Broadway to the Planning Staff for approval.	BP	Planning	
30	Street trees shall be planted in accordance with City Arborist requirements. The tree pits shall be filled with structural soil of not less than 2500 cubic feet per tree and the tree grates will be the City standard size and detail. All construction and installation shall be in accordance with DPW standards.	BP	Planning	
31	The revised Landscape Plan shall specify that the trees in the 10' buffer adjacent to 12 Glen Street must be mature at time of planting and be a quick growing varietal of a species approved by the City Arborist.	BP	Planning	
32	The Applicant shall provide a shared vehicle space in the parking garage and engage a vendor to provide a shared vehicle for the residents.	BP	Planning	
33	The retail spaces may be combined into one larger space as necessary for commercial tenants. Removal and/or addition of the demising wall shall be considered a <i>de minimus</i> change provided there are no more than two spaces and the uses remain in the Small Retail and Service Use Cluster as provided in SZO §6.1.22.E.	BP	Planning	
34	A green roof shall be required as proposed in the original approvals from 2017. The Applicant shall provide a Detailed Roof Plan showing the design of a greenhouse/pavilion originally approved, the area of photovoltaic solar panels, the paving or decking activity areas with possible furnishing locations, and the extent and type of plantings in the roof garden (green roof) for review and approval by the Planning Staff.	BP	Planning	
35	Above-ground transformers that are visible from the public way shall be wrapped with a decorative wrapping and/or screened with plantings. The Applicant shall work with Planning Staff to accomplish this condition.	CO	Planning	
36	All utility rooms shall be located in the basement.	CO	ISD/PIng	
Public Safety				
37	The Applicant or Owner shall meet the Fire Prevention Bureau's requirements.	CO	FP	
38	A revised Landscape Plan shall be submitted to Planning Staff through the Zoning Review Planner showing the Fire Department's requested walkway along the rear/side of the building at the head of the parking spaces. The Landscape Plan shall also be updated to show that the required planted buffer at the rear of the property is the requisite 10'.	BP	FP/ISD/PIng	
39	Any transformers should be located as not to impact the landscaped area, and shall be screened to the extent allowable by code. The Applicant will work with the City and the utility company to minimize noise.	Electrical permits & CO	Wiring Inspector	

40	Notification shall be made, within the time period required under applicable regulations, to the Massachusetts Department of Environmental Protection (DEP) if there is any release of oil, hazardous materials, or regulated hazardous substances at the site. The City’s OSE office, Fire Department and the Board of Health shall also be notified.	At time of release	OSE/FP/BOH	
41	To the extent possible, all exterior lighting must be confined to the subject property, cast light downward and must not intrude, interfere or spill onto neighboring properties.	CO	Planning	
42	The Applicant shall provide notice of intent to strictly comply with applicable State and Federal regulations regarding air quality including without limitation continuous dust control during demolition and construction.	CO	Planning/ OSE	
Signage				
43	Signage for the commercial uses shall be limited in size and location to the signage band above the storefront(s) on Broadway and Glen Street. Residential building name and/or address signage shall be limited to the canopy above the residential lobby entrance on Glen Street. Signage lighting after 10p.m. facing residential property shall be turned down or off. All signage design, size, and placement shall be submitted to Planning Staff through the Zoning Review Planner for review and approval prior to ordering/installation. Any additional signage shall be required to apply for approval through the Special Permitting process.	CO/ Perpetual	ISD/Plng	
Final Sign-Off				
44	The Applicant shall contact Planning Staff at least five working days in advance of a request for a final inspection by Inspectional Services to ensure the proposal was constructed in accordance with the plans and information submitted and the conditions attached to this approval.	Final sign off	Planning
