A short list of respondents will then be invited to City Hall for an interview with the Evaluation Committee, during which they will present very initial design concepts, project teams, project timelines, etc. (The Mayor may, at the Mayor's sole discretion, also elect to interview the applicants on the short list.) The short listed firms will in turn be evaluated based on their interviews and presentations. The City reserves the right to reject any and all RFQs if it determines that the criteria set forth have not been met.

Fee Negotiations

The design fee will not be subject to amendment and the maximum allowable fee is set at \$90,000. The construction budget and the funding source for the Path renovation have not been fully determined but the budget is expected to be \$900,000 to \$1,000,000.

The City will prepare the contract and submit it to the successful applicant for signature. Upon receipt of the executed contract and all other required documents from the designer, Purchasing will have the contract signed by the appropriate City officials. This award will result in the issuance of a purchase order to be delivered with a fully executed contract to the designer. Unless otherwise stated, the issuance of the purchase order and fully executed contract is tantamount to a Notice to Proceed, at which time the successful applicant will be expected to begin work under the contract.

1.0 Summary

The City plans to make improvements to the Somerville Community Path, an existing multi-purpose path running from the Somerville/Cambridge line west of Davis Square to the eastern terminus at Lowell Street. The Community Path will continue to serve as a recreation area and transportation corridor for cyclists, walkers, and joggers in the community.

The project is being funded with Somerville Community Preservation Act funds and is collaboration between the City of Somerville and the Friends of the Community Path. A project committee that includes City staff and the Friends of the Community Path will meet every other month during the course of the project to review progress. The scope of this project is to work closely with these stakeholders from schematic design through design development with the goal of producing a full set of construction documents and specifications for the construction of the path improvements.

The design will explore four themes:

- 1) Drainage and flooding improvements through surface interventions, such as bioswales, raingardens, and landscape plantings. Considerations include all grading and vegetation, street crossings, abutting properties, soils, degrees of shade/sunlight, and requirements for minimal to low maintenance.
- 2) Landscape designs that reflect the unique character of the Path. Considerations include existing community spaces, possible expansions of community gardens, accommodations for runners and dog walkers, and installation(s) that reveal the cultural history of the Path as a railroad bed.
- 3) Sustainable landscape planting strategies designed to improve the natural character, biodiversity, and environmental health of the path's ecological systems. Areas of particular focus shall include the wholeness and quality of the tree canopy, prioritizing native species, the removal of invasive species like Japanese Knotweed, and Black Swallow-wort, and the appropriate plantings of understory and ground layer species.
- 4) Improving the public safety and accessibility through additional lighting, signage to support wayfinding and path etiquette, and improved connections to the surrounding neighborhoods, including attractive entrances and exits, which meet or exceed ADA code requirements.

The final design will address the following criteria:

- Cost to implement
- Timelines to implement
- Technical, legal, and logistical feasibility
- Potential to improve drainage
- Safety/ADA accessibility
- Ease and cost of maintenance
- Aesthetic appeal
- User experience
- Environmental sustainability
- Longevity
- Community feedback

Because the Community Path was the location of a rail line, and historically some railroad operations have incorporated the use of pesticides or petroleum products to maintain vegetation, or service trains, the City will require the consultant to have a Licensed Site Professional (LSP), as part of their design team.

It is anticipated that some excavations may be required as part of final design, and in accordance with MCP guidelines, the City will require that no surplus soils be removed from the work zone, and any excavated soils shall be incorporated into the final design as landscape features. As part of the project specifications the consultant will be required to generate all specifications for the handling of soils in accordance with the applicable environmental and hazardous material laws.

The City of Somerville's use of the Path is governed by an alternative transportation corridor lease agreement between the MBTA and the City of Somerville. Therefore, per the conditions of the agreement, all plans for improvements to the path will be provided to the MBTA for approval a minimum of sixty days prior to bidding. Copies of the MBTA Corridor Lease agreement shall be available from the City upon request.

The consultant shall be a registered Landscape Architect in the state of MA and have experience working with diverse teams of stakeholders. Special attention will also be paid to meeting all ADA and safety regulations and runoff calculations. The preferred consultant's design team shall include a Professional Engineer, a LSP, a lighting consultant, an arborist, and an invasive species consultant.

2.0 Project Vision

The Somerville Community Path is loved in Somerville for both the recreational opportunities, and the natural respite it provides as Somerville's largest open space and for the unique experiences users can have as they travel the Path. Our vision is that the final design for the Path will enhance these experiences, and the ecological functioning of the landscape, while improving drainage through interventions compatible with the City's lease with the MBTA. The design will reflect and enhance the naturalistic feel of the Path, which has evolved over time to become a uniquely Somerville space. The design will also identify nodes that will create new natural and experiential opportunities, improve drainage, provide sustainable plant habitats, address safety considerations, and celebrate the history of the Path as a former rail bed. The goal of the project is to best serve Somerville residents of all ages in a way that promotes healthy living and public outdoor activity.

3.0 Project Site

The Somerville Community Path is a 1.15 mile, 8 acre linear park that runs from the Somerville/Cambridge line west of Davis Square, to the eastern terminus at Lowell Street adjacent to the Visiting Nurses Association building. The new stretch of the Path between Cedar and Lowell Streets was completed in 2015 by MassDOT. The Path surface from Davis Square to Cedar Street was repaved in 2017.

The City Engineering Department is currently undertaking two localized drainage projects on, or adjacent to the path. The first project, in the area west of Davis Square, will address sub-surface drainage improvements and repaving the path surface from Davis Square to the Cambridge line, and the landscape planting plans for this area shall be included within this project's scope of work. The second project, east of Davis Square, will address repairs to a drain pipe, and will reduce the frequency and intensity of flooding between Willow Ave. and Grove St. and portions of Winslow Ave. However, while the work to be done is adjacent to the Path, it is largely out of the right of way, and is unlikely to impact the scope of this project. And it is only mentioned here as it will help address some of the drainage and flooding issues on the path. Plans and a staff review of each project will be available to the consultant upon award of the project. Both projects will be completed during 2018 construction season.

Future plans for the Green Line extension include extending the path from the current Lowell St. terminus to Washington Street in Somerville. This extension is not included in this scope of work.

The design fee will not be subject to amendment and the maximum allowable fee is set at \$90,000. The construction budget and the funding source for the Path renovation have not been fully determined but the budget is expected to be \$900,000 to \$1,000,000.

3.0 Public Process

A through and engaging public process will be an essential component of the Path design. A minimum of four public meetings, but no more than seven, including one weekend site meeting and community walk will be required. Public meetings will be advertised by the CPA project liaison and will be comprised of a large group of stakeholders including, but not limited to, Somerville residents and business owners, community groups, abutters, and aldermen. Public meetings will be planned in conjunction with City staff and the Friends of the Community Path.

4.0 Tasks & Schedule

8. Default; Termination; Remedies

A. Events of Default

The following shall constitute events of default under this Contract: (1) The Vendor has made any material misrepresentation to the City; or (2) a judgment or decree is entered against the Vendor approving a petition for an arrangement, liquidation, dissolution or similar relief relating to bankruptcy or insolvency; or (3) the Vendor files a voluntary petition in bankruptcy or any petition or answer seeking any arrangement, liquidation or dissolution relating to bankruptcy, insolvency or other relief for debtors; or (4) the Vendor seeks or consents or acquiesces in the appointment of any trustee or receiver, or is the subject of any other proceeding under which a court assumes custody or control over the Vendor or of any of the Vendor's property; or (5) the Vendor becomes the defendant in a levy of an attachment or execution, or a debtor in an assignment for the benefit of creditors; or (6) the Vendor is involved in a winding up or dissolution of its corporate structure; or (7) any failure by the Vendor to perform any of its obligations under this Contract, including, but not limited to, the following: (i) failure to commence performance of this Contract at the time specified in this Contract due to a reason or circumstance within the Vendor's reasonable control, (ii) failure to perform this Contract with sufficient personnel and equipment or with sufficient material to ensure the completion of this Contract within the specified time due to a reason or circumstance within the Vendor's reasonable control, (iii) failure to perform this Contract in a manner reasonably satisfactory to the City, (iv) failure to promptly re-perform within reasonable time the Services or Supplies that were properly rejected by the City as erroneous or unsatisfactory, (v) discontinuance of the Services or Supplies for reasons not beyond the Vendor's reasonable control, (vi) failure to comply with a material term of this Contract, including, but not limited to, the provision of insurance and nondiscrimination; or (8) any other acts specifically and expressly stated in this Contract as constituting a basis for termination of this Contract.

B. Termination Upon Default.

Notwithstanding the above, in the event of a default by the Vendor, the City, acting through its Chief Procurement Officer, may give notice in writing of a default, which notice shall set forth the nature of the default and shall set a date, by which the Vendor shall cure the default, subject to approval of the City.

If the Vendor fails to cure the default, the City, in the alternative, may make any reasonable purchase or contract to acquire goods or services in substitution for those due from Vendor. The City may deduct the cost of any substitute contract or nonperformance together with incidental and consequential damages from the Contract price and shall withhold such damages from sums due or to become due to the Vendor. If the damages sustained by the City exceeds sums due or to become due, the Vendor shall pay the difference to the City upon demand.

Upon immediate notification to the other party, neither the City nor the Vendor shall be deemed to be in default for failure or delay in performance due to Acts of God or other causes factually beyond their control and without their fault or negligence. Subcontractor failure to perform or price increases due to market fluctuations or product availability will not be deemed factually beyond the Contractor's control. The City retains all rights and remedies at law or in equity.

If the Vendor fails to cure the default within the time as may be required by the notice, the City, acting through its Chief Procurement Officer, may, at its option terminate the Contract.
