Appeal #ZBA 2011-75 was opened before the Zoning Board of Appeals at Somerville City Hall on November 2, 2011. Notice of the Public Hearing was given to persons affected and was published and posted, all as required by M.G.L. c. 40A, sec. 11 and the Somerville Zoning Ordinance. After one hearing of deliberation, the Zoning Board of Appeals took a vote.

DESCRIPTION:

The Applicant is proposing to construct a 4.5 foot wide by 5 foot deep enclosure around an existing wheelchair lift on the left side of the dwelling. One of the occupants of the dwelling is confined to a wheelchair and to assist him in getting to and from work the doorway and chair lift were installed in the 1990's. Currently the lift is entirely exposed to all of the elements and during the last two winters the lift has sometimes become frozen and inoperable, making it impossible for the occupant to go to work. The proposed project would construct a sloped roof over the lift at the same pitch as the as the roof over the existing enclosed front porch. The lift enclosure would also include two side walls to provide additional protection from the elements. One side of the lift would remain open to allow access onto and off of the lift.

FINDINGS FOR SPECIAL PERMIT (SZO §4.4.1 & §5.1):

In order to grant a special permit, the SPGA must make certain findings and determinations as outlined in §5.1.4 of the SZO. This section of the report goes through §5.1.4 in detail.

1. Information Supplied: The Board finds that the information provided by the Applicant conforms to the requirements of §5.1.2 of the SZO and allows for a comprehensive analysis of the project with respect to the required Special Permits.

2. Compliance with Standards: The Applicant must comply "with such criteria or standards as may be set forth in this Ordinance which refer to the granting of the requested special permit."

In considering a special permit under §4.4 of the SZO, the Board finds that the alterations proposed would not be substantially more detrimental to the neighborhood than the existing structure. The existing front porch is already enclosed and therefore the proposed project would not greatly alter the streetscape along Wallace Street. The proposed siding type and color, roofing, trim, and materials of the enclosure will match those of the existing structure, including the roof pitch of the proposed enclosure which will be the same as the roof pitch on the existing enclosed front porch. The proposed enclosure would only extend the left side of the front façade towards the left property line an additional 4 feet, however, the proposal would not reduce the existing left side yard setback because the proposed enclosure would still be within the existing building envelope. The proposal, however, would reduce the existing nonconforming front yard setback by 6 inches towards the front of the lot from 7 feet to 6.5 feet. The landscaping and parking conditions at the site would remain the same as the area where the lift currently sits is already paved and the enclosure would not interfere with traffic flow on the property. The property will remain a 1½ story, single-family residential use which is consistent with the surrounding neighborhood.

3. Consistency with Purposes: The Applicant has to ensure that the project "is consistent with (1) the general purposes of this Ordinance as set forth in Article 1, and (2) the purposes, provisions, and specific objectives applicable to the requested special permit which may be set forth elsewhere in this Ordinance, such as, but not limited to, those purposes at the beginning of the various Articles."

The proposal is consistent with the general purposes of the Ordinance as set forth under §1.2, which includes, but is not limited to promoting "the health, safety, and welfare of the inhabitants of the City of Somerville; to provide for and maintain the uniquely integrated structure of uses in the City; to secure safety from fire, panic and other dangers; to conserve the value of land and buildings; and to encourage housing for persons of all income levels."

The proposal is also consistent with the purpose of the district (6.1.1. RA - Residence Districts), which is, "To establish and preserve quiet neighborhoods of one- and two-family homes, free from other uses except those which are both compatible with and convenient to the residents of such districts."

4. Site and Area Compatibility: The Applicant has to ensure that the project "(i)s designed in a manner that is compatible with the characteristics of the built and unbuilt surrounding area, including land uses."

The structure will remain a 1½ story, single-family residential use which is consistent with the surrounding neighborhood.

5. Adverse environmental impacts: The proposed use, structure or activity will not constitute an adverse impact on the surrounding area resulting from: 1) excessive noise, level of illumination, glare, dust, smoke, or vibration which are higher than levels now experienced from uses permitted in the surrounding area; 2) emission of noxious or hazardous materials or substances; 3) pollution of water ways or ground water; or 4) transmission of signals that interfere with radio or television reception.

No adverse environmental impacts are anticipated from this project. No new noise, glare, smoke, vibration, nor emissions of noxious materials, nor pollution of water ways or ground water, nor transmission of signals that interfere with radio or television reception are anticipated as part of the proposal. The structure will remain a 1½ story, single-family dwelling and will continue to be used for residential purposes.
