Case #: PB 2011-16

Date: October 17, 2011

Recommendation: Conditional Approval

PLANNING STAFF REPORT

Site: Assembly Square, "C" Street, Block 3

Applicant Name: Street Retail Inc.

Applicant Address: 1626 East Jefferson Street, Rockville, MD 20852

Property Owner Name: Street Retail Inc. & FR Assembly Square, LLC

Property Owner Address: 1626 East Jefferson Street, Rockville, MD 20852

Agent Name: Goodwin Procter LLP

Agent Address: Exchange Place, 53 Exchange St, Boston, MA 02110

Alderman: William Roche

Legal Notice: Applicant, Street Retail Inc., & Owner, Street Retail Inc., FR Sturtevant Street LLC, SRI Assembly Row B2, LLC, SRI Assembly Row B3, LLC, SRI Assembly Row B5, LLC, SRI Assembly Row B6, LLC, SRI Assembly Row B7, LLC, SRI Assembly Row B8, LLC, and SRI Assembly Row B9, LLC, and FR Assembly Square, LLC, seek a Special Permit with Site Plan Review-A, final level approval of "Block 3" of the Planned Unit Development Preliminary Master Plan (PUD-PMP) approved by the Planning Board on December 14, 2006 and as revised on August 5, 2010. Applicant and owner seek approval under SZO Article §16.8.3 and §5.2, to construct an approx 417,204 gsf project including 2 levels of retail, restaurant, and other commercial uses as approved in the PUD-PMP and a 60,000 sf cinema, along with approx 571 parking spaces in a 5-story garage, two loading bays, and associated service areas. The Applicant and Owner also seek a special permit for signage under §5.1 and §6.4.14 to install signs that are over 35 feet from finished grade and larger than the by-right size. A waiver is required under SZO §6.4.12 and §16.5.5 for fewer loading spaces than required under §9.16.3 and §9.7.

Parcels: 85-A-6 & 86-A-1 (133 Middlesex St)

Zoning District/Ward: Assembly Square Mixed Use District (ASMD); Planned Unit Development Overlay District - A (PUD-A) / Ward 1

Zoning Approval Sought: Special Permit with Site Plan Review–A under SZO § 16.8.3, §5.2, Special Permit for signage under §5.1, §6.4.14

Date of Application: September 22, 2011

Dates of Public Hearing: Planning Board October 20, 2011

I. BACKGROUND & PERMITTING PROCESS

On December 14, 2006, the Planning Board granted Planned Unit Development-A-Preliminary Master Plan (PUD-PMP) approval, subject to certain conditions, for a development area that includes the subject property. On August 5, 2010, the Board granted a revision to the PUD-PMP. Subsequent minor amendments and subdivisions have been filed that do not substantially impact this site. The PMP is for a mixed-use, transit-oriented development with approximately 5 million square feet of total development including 1.75 million sf of commercial space (including but not limited to office, research and development, laboratory, medical office, manufacturing, etc.), 512,000 sf of retail space including restaurants and cinema, up to 340,000 sf IKEA store, 2,100 residential units, up to a 200-room hotel, the existing Assembly Square Marketplace and approximately 10,066 parking spaces. The revised PMP includes the same overall development program as the original with adjustments to improve the urban design relationship of uses, the quality of the open space along the Mystic River, pedestrian and bicycle circulation, and the financial feasibility of the Project. Design Guidelines were adopted to complement the guidelines in §16.7. The guidelines establish façade hierarchies, district gateways, and key building elements to promote a cohesive PUD while still allowing for flexibility and creativity in design. A new scheme for identifying buildings was established. The label of the subject property of this application changed from Building B to Block 3.

The Planning Board has issued Special Permits with Site Plan Review-A, the second phase of approvals after the PUD-PMP, for the Marketplace (Phase 1AAA), IKEA (Phase IAA), and for Blocks 1, 4 and 10 of Phase IA.

A. Review Requirements under the Somerville Zoning Ordinance

This application is for a Special Permit with Site Plan Review–A (SPSR-A) for a development of a portion of 133 Middlesex Avenue, parcels 85-A-6 and 86-A-1. As set forth in §16.8 of the Somerville Zoning Ordinance (SZO), “Application for PUD is a type of special permit with site plan review [SPSR], requiring two (2) stages of review. A PUD Applicant shall first file a preliminary master plan demonstrating a comprehensive land use plan for the entire PUD tract. Upon approval of this plan, the Applicant may then submit special permit with site plan review applications for definitive plans of each portion or phase of development of the PUD tract.”

The Applicant is seeking SPSR-A final level approval of a planned unit development under the revised Planned Unit Development Preliminary Master Plan (PUD-PMP) approved by the Planning Board on August 5, 2010. The applicant submitted the current application in September 2011. The PUD-PMP conditions and findings provide the basis for the review of this type of application. A subset of the requirements are required findings for each SPSR-A. The fulfillment of the required findings is indicated as such in the attached Appendixes.

B. Organization of Report

The present report includes the following sections:

- Description of the Property;
- Description of the Proposal;
- Department Comments;
- Public Comments;
- Staff Findings for Special Permit with Site Plan Review–A; and
- Staff Recommendation for Board vote, including recommended conditions of SPSR-A approval.

II. DESCRIPTION OF PROPERTY

A. Site

The total land area of the Master Plan is 2.67 million square feet or 61.3 acres and the area of Block 3 is 113,138 sf or 2.6 acres. The land is currently vacant and is overgrown with vegetation.

Approximate location of the Block 3 Proposal

B. Surrounding Area

The area surrounding the proposed site contains the Assembly Square Marketplace and its parking lot on the opposite side of Assembly Square Drive to the west. Assembly Square Drive roadwork and landscaping that were part of the Phase IAA approval are underway. The future development Blocks 1, 5 and 4 are to the north, south and east. The Planning Board approved developments for Block 1 and 4 on October 6, 2011. Block 1 will be a 5-story, approximately 437,840 gsf building including 195 residential units and approximately 67,530 gsf of a mix of retail, restaurant and other commercial uses. Block 4 will be a 5-story, approximately 439,660 gsf building including 253 residential units and approximately 43,975 gsf of a mix of retail, restaurant and other commercial uses. Block 5 is anticipated to be primarily residential with towers of up to 250 feet and retail on the first and second floors.

III. DESCRIPTION OF PROPOSAL

A. Overall

The proposal consists of developing a 113,138 sf parcel that is adjacent to Assembly Square Drive and near the Mystic River Reservation. The proposal is a 417,204 gsf building that will be 3 to 5 stories and 79 feet, 6 inches tall. The building will house 122,967 sf of retail, restaurant, and other commercial uses as approved in the PUD-PMP on two floors, a 60,000 sf cinema with 2,310 seats and 12 screens and a 4-story parking garage over the first floor with 571 parking spaces and associated service areas. It is anticipated that the project will employ 345 people and the hours of operation are expected to be from 8am to 2pm.

Compliance with dimensional standards is shown in the table below.

DIMENSIONAL REQUIREMENTS	PUD-A	Approved PUD	Proposed Project
Minimum lot size	20,000 sf	66.5 acres	113,138 sf (2.6 acres)
Frontage	-	-	Longest distance along "D Street" 398 ft

DIMENSIONAL REQUIREMENTS	PUD-A	Approved PUD	Proposed Project
Front yard setback	No minimum	-	5.66 ft
Side yard setback (left)	No minimum	-	9.08 ft
Side yard setback (right)	No minimum	-	10.27 ft
Rear yard setback	No minimum	-	3.64 ft
Maximum Floor area ratio (FAR)	10.0	2.0	1.62* based on nsf of 182,917
Maximum height, feet	70 feet up to 250 feet	Varying up to 250 feet	79 ft 6 in
Minimum lot area/per dwelling unit	No minimum	Approx 1379	N/A
Total open space (%)	25%	25.3%	6.7 %*
Useable open space (%)	12.5%	18%	1.7 %*

* The dimensional requirements do not need to be met for each individual SPSR as they contribute to the approved PUD that does comply with the dimensional requirements.

B. Site Design and Access

The project area is rectangular and is framed by “Main Street”, “C Street”, “D Street” and Assembly Square Drive. The Applicants will be submitting a subdivision plan when agreements related to the ownership of land on Block 4 are complete, which is anticipated to occur in the next few months. At that time the streets of the Planning Unit Development will be named and the buildings will be assigned addresses. Pedestrian access will be via sidewalks around the building with varying widths of between 14 and 19 feet except that the cinema lobby projects into the sidewalk width to create a prominent entrance. There will be four main pedestrian entrances to the building. A large cinema lobby will be accessible from “Main Street” and “C Street”. The second floor retail lobby will be accessible from “D Street”. “D and C Streets” also contains pedestrian entrances to the parking garage. The first floor retail entrances will be located off of the sidewalks with separate entrances for each retailer. Vehicular access onto the site will be off of “C Street” near the middle of the block. The driveway into the block will lead to a ramp to reach the structured parking area. Access to the loading areas will be from “D Street”. Trucks will back into or out of the loading areas on “D Street” and proceed onto Assembly Square Drive and Route 28.

C. Building Shape and Placement

The building was designed to be pedestrian-friendly on all sides with no perceived back of the building. The site is highly visible from the existing mall and parking lot, the plaza proposed to be in front of the site on Block 2 and “Main Street”. There is retail on the ground floor along all four sides of the building. The building is more than the 490 foot Chapter 91 Boundary from the river.

The form of the building varies from the general form anticipated for the Block as part of the Preliminary Master Plan Approval primarily because the 8-story hotel will not be built on this Block and the cinema floor plate has been rotated to address tenant needs, which shifted the parking garage to floors two through five along the Assembly Square Drive side of the building. Also, there will be no parking at-grade as was originally proposed and retail now will wrap the first floor of the building. As was originally proposed retail occupies a portion of the 2nd story along “Main Street”. The cinema will occupy more than half of the 3rd story and the remaining portion will be the parking garage. The height of the building will be approximately ten feet taller at its tallest portion for the cinema ceiling than the mass in the PUD-PMP. The garage portion will be lower at 62 feet tall and the 110 foot portion in the PUD-PMP where the hotel was proposed will not be constructed.

D. Uses

The ground floor use of the building and a portion of the second floor are proposed to be retail, restaurant and other commercial uses as approved in the PUD-PMP. 512,000 sf of retail space including restaurants

was permitted through the PUD-PMP and as the blocks of the plan are developed, the total square feet of each use category will be tracked. A list of specific uses in the use table was approved as part of the PUD-PMP and the commercial first and second floor could contain a mix of those approved uses. The number of storefronts is not yet known and will likely vary as tenants swap in and out of the building in the future. The PUD-PMP allows for the storefront design to be determined by the retail tenant to reflect the tenant's individual brand identity subject to a yet to be submitted design document. The storefronts are not intended to conform to the design of the base building.

The cinema use (SZO section 7.11.6.4.b) will be located on the third floor and occupy 60,000 sf with 2,310 seats and 12 screens. The 60,000 sf is included in the approved 512,000 sf for retail in the PUD-PMP.

The parking will serve the retail, restaurant, and cinema uses within the building and may serve other uses in the ASMD.

E. Linkage

The City, the Somerville Redevelopment Authority, IKEA, and Federal Realty Investment Trust have entered into a development covenant from 2006 that establishes that linkage will be paid after the first 300,000 square foot of space is constructed in the PUD PMP, excluding the existing Mall. Linkage will be paid for IKEA's square footage. Appendix F is a table of the square footage that is built in the PUD to keep track of when linkage payments will be required. Linkage payments are not yet due because the total square feet that the Planning Board approved in the PUD-PMP has not yet reached 300,000.

F. Landscaping and Open Space

Landscaping: There is no landscaping proposed for the site, which is typical for an urban site. The retail tenants could provide planters but those details are not yet defined. Landscaping across the Assembly Row site is concentrated in publically accessible well-programmed public space.

Usable Open Space: The usable open space on the site is around the building adding to the width of the sidewalks. Under §16.6.1 of the SZO, the usable open space must be permanent, made accessible to the public at a minimum from 9:00 am to 5:00 pm, and protected through a covenant or other appropriate legal instrument. This site has 1.7% (approximately 1,964 square feet) of usable open space. Larger areas of usable open space will be on other parcels were they are consolidated to make larger spaces that will connect the Assembly Row development to the waterfront. For example, the large open spaces near the site are on Block 2 and between Blocks 4 and 6. The overall calculation of useable open space in the PUD is 18 percent.

G. Parking and Loading

The minimum parking requirements are 1 per 1,000 sf of retail space and 1 per 500 nsf of restaurant space. The cinema is included in the retail square footage in the PMP-PUD. The minimum number of spaces for this development is between 183 and 306 parking spaces depending on the breakdown of retail and restaurant uses.

The proposal is for 571 parking spaces that will be accessible via a control gate at the entrance to the garage on the second floor. If the utilization of the parking spaces is lower than anticipated as the buildings are tenanted and parking utilization is determined, excess parking spaces could meet the demand for future development of the PUD without building more parking, subject to the requirements of the SZO.

The maximum number of parking spaces allowed does not apply until the new MBTA station is constructed and open. The number of parking spaces will exceed these limits if the commercial space on the first and second floor was primarily retail as opposed to restaurant uses. The maximum allowed is 1

per 500 sf of retail space, and 1 per 250 sf of restaurant space. The maximum allowed would be between 366 and 612 parking spaces depending on the breakdown of retail and restaurant uses.

The number of required loading docks varies depending on the mix of retail and restaurant uses. The Applicant has determined that the maximum number of loading docks that would be required is 10. The requirement for retail is 3 for between 35,001 sf and 50,000 sf and 1 for each additional 50,000 sf, 3 for restaurants between 16,001 and 40,000 and 1 for each additional 40,000 sf, and the cinema loading is as needed. The proposed number is 2.

The non-residential use bicycle parking requirements is one space for every 10 required parking spaces. The requirement is for a minimum of 18 spaces. The total bicycle parking spaces is 20. The bicycle storage is on the southwestern corner of the building on each story of the parking garage.

H. Waivers & Other Relief Requests

The Applicant is requesting three waivers from the requirements of the Zoning Ordinance for signage height and size, the number of loading docks, and the submission requirement for providing a 3-D model of the site.

The Applicants are seeking a special permit in order to waive the signage requirements related to the 35-foot height limit from finished grade. The type of signage that will be above the 35-foot height limit will be the cinema sign and two retail signs at approximately 70 feet. The signs will be located on the cinema façade facing Assembly Square Drive, which is setback approximately 110 feet from the garage façade below. The signs will only be visible from a distance from the site and will be visible from Interstate 93. The materials and lighting of the signs have not yet been submitted. Other signs that will be along the first and second floors will be two other cinema signs, two garage lobby signs, and the parking entrance sign. One of the cinema signs will be on a rounded sign that wraps the corner of the building and the other will be individual letters that will sit on top of the metal canopy at the cinema entrance. The parking signs will be applied parallel to the facade.

The signs also exceed the size allowance under Section 12.4.4 on the Assembly Square Drive side of the building. The cinema and two retail signs on are a total of 1,176 sf and the allowance is for 614 sf. The square footage of the cinema and parking signs on the other sides of the building are below the allowable square footage.

The second waiver is for the number of required loading docks. The requirement is dependent on the breakdown of retail versus restaurant space. Since the breakdown has not yet been determined, the Applicant calculated that the maximum number of loading docks required to be 10 and 3 will be provided. The rationale for providing less than the maximum number of loading spaces is that allocating less ground floor space to loading results in more square footage for retail and restaurant uses that enliven the district. Moreover, two loading spaces will be sufficient for the proposed retail, restaurant, and recreational uses. Several of the tenants will likely use vans for deliveries and two vans can fit in a loading area designated for a larger truck. Most of the deliveries will occur in the weekday morning. The site will be managed to minimize shared loading conflicts.

The final waiver is for a submission requirement to provide a 3-D model of the site. The renderings submitted give context to the proposal and achieve a similar purpose as a 3-D model. Also, the proposed building is consistent with the conceptual 3-D model that was constructed for the entire PUD. Therefore, the model is waived unless the Planning Board requests it.

I. Form and Design of the Building

The form and design of the building were not directly addressed at the PUD-PMP review, as this was left for the more detailed SPSR-A review. The original design guidelines adopted as part of the PMP address

this block; however, since the hotel is no longer a potential tenant for this site and the cinema floor plate has been shifted to address tenant needs, the design guideline has changed to reflect the current plan.

The following is a comparison of the revised design guideline and the original design guideline. In both versions of the design guideline the facades of the building and corners are assigned hierarchies to help reinforce the importance of a public open space, break down the scale of an elevation and allow for parts of the building to be background so that others can be foreground. The corners of the building were assigned functions to provide a framework of the overall PMP. There is still a significant corner at “Main Street” and “C Street” and secondary corners for the southern corners of the building. The Assembly Square Drive and “C Street” corner changed from a secondary corner to a significant corner. The vehicular access to the Block will still be off of “C Street” and be located mid-block. Because the hotel will not be located on this Block, the vehicular access and hotel lobby entrance off of “D Street” has been removed. The loading access will remain in the same location off of “D Street”.

The designation of the quality of the facades of the building has also changed. The “Main Street” façade now has two levels of a primary elevation with a secondary elevation above instead of one level of a primary elevation and a secondary elevation above. The access to the upper level retail and cinema on “Main Street” became a potential area for tenants to have a vertical expression of the retail that would extend up to the second floor. Access to the second floor could be through the first floor retail space instead of through a separate entrance off of the sidewalk. The building mass of the cinema will now be setback from Main Street. “D Street” will remain as a residential street with street level retail that will abut a retail and residential building. The hotel lobby entrance has changed to a pedestrian garage entrance with the vertical circulation of the garage expressed on the exterior. There is also access to upper level retail along this elevation. The loading area is in the same location but is no longer recessed. The parking garage is now visible on “D Street” with a “type 1” façade, which is the type with high quality materials. The Assembly Square Drive façade now has a primary elevation along the length of the ground floor and “type 1” parking above instead of parking along a portion of the first five floors and a secondary elevation above. “C Street” will continue to have retail on the ground floor with the parking garage above for a portion and a secondary elevation on the upper levels. The access to the upper level cinema has been pushed back from “Main Street” and projects out from the main façade so that it is more prominent.

Overall, the key connections on which the design guidelines are based have not changed. It is unfortunate that the hotel will not be included on this Block of the PUD; however, the approval for a hotel will carry over onto another block. The revised design guideline is further refined to address the current tenant plans for the building, while continuing to fit in with the framework for the PUD.

Comments before the revised guideline and plans were submitted.

Staff reviewed the Applicants’ first and second submission of a draft of the building design and asked for revisions in consultation with the Design Review Committee to address the following concerns and inconsistencies with the original guideline before the revised guideline was submitted:

“Main Street”

- The primary corner or entrance to upper level retail and cinema should be on Main Street to “express the presence of mid-block access to upper level retail”.
- The rooftop terrace that was on the second story along Main Street was removed and it provided some interaction with the street and interest on this side of the building. The original trellis over the terrace should be redesigned because as proposed it was not complementary to the design of the building.
- There should be a primary façade for a portion of the upper stories to connect the first and second story to the upper floors of the building and break up the metal façade above.

- The false windows originally proposed on the metal panels should be removed and this façade should be broken up in a different way. The panel design on the “C Street” elevation could wrap the corner onto the “Main Street” elevation.

“D Street”

- The entrance to the second floor retail space should extend upward from its current location.
- The southwestern corner should have a primary facade that extends to the top floor, which will help to reduce the garage prominence along Assembly Square Drive.

“C Street”

- This is a successful façade.

Assembly Square Drive

- Mid block parking should be setback to mitigate the presence of exposed parking.
- The garage façade is a “Type 3” garage but now it comprises a much larger area and will abut the open parking on Block 1.

Compliance with the revised guideline and plans

The revised proposal relates to the revised design guideline in the follow way. The retail tenants will dictate the primary first floor elevations that wrap much of the building; however, the design will have to comply with the storefront design guidelines.

“Main Street”

The primary facades on “Main Street” will be brick with a detailed cornice. The second floor windows will be vertically oriented and the design will vary mid-block. The secondary upper floor elevations will be horizontal metal panels and corrugated metal panels with a horizontal detail that has yet to be defined. The significant corner on this façade will be made of brick and have similar windows as the façade to the right but it will be defined because it will be taller than the rest of the brick and will have the potential to be lit.

“D Street”

The significant corner will appear the same along “D Street” as it did on “Main Street”. The primary elevation on “D Street” will be metal panels, which will be flat and have a cornice unlike the corrugated metal panels in the secondary elevation above. The retail entrance will appear significant with its height projecting above the other panels on this façade, a metal canopy, and a significant amount of glazing. The parking garage “type 4” entrance will meet this standard as it will be clad with metal panels and expose the vertical circulation of the garage.

Assembly Square Drive

The garage along Assembly Square, “D Street” and “C Street” facades will be a “type 1” treatment. “Type 1” treatment is supposed to be made up of high quality materials as part of the column and spandrel design and it should be incorporated in color or material with the uses below. The garage is made up of precast concrete panels with wide and narrow columns, railings and some decorative details to break up the horizontal strip openings and horizontal concrete panels. The thicker concrete columns line up with the brick columns that are incorporated into the retail storefronts below. The secondary corners of the building will be brick walls and piers and have decorative cornice lines and fascia. The second floor and towers will have metal mullions but the entire garage will be open to the air.

“C Street”

The “C Street” side of the building will contain the primary entrance to the cinema, which will be a glass curtainwall from the street level to the roof height. Other features of this façade include another “type 4” garage entrance; however, this one has a glass storefront wall from floor to ceiling to expose the vertical circulation of the garage. The primary façade on the upper stories is made of horizontal metal panels with

a feature detail, which is also proposed for a portion of the “Main Street” façade. Part of the garage façade along “C Street” will continue to have a concrete columns and spandrel design but will include mullions to give the appearance of windows.

The design guidelines for the Block are attached to this report.

The revised plans largely address the concerns noted above and a recommended condition will allow for time to further refine these details. The condition allows for the following elements of the building design to be altered per Planning Staff approval after review and comment from the Design Review Committee: increase the height of vertical elements in the streetscape façade past the second story of the building, change in material or material pattern of the metal panels, inclusion of a rooftop terrace on the second story roof with or without a canopy/trellis structure for the cinema along Main Street, adjustment of the placement of the prominent bay along Main Street to match the location of the primary retail entrance along the street, and change in the location of the bicycle parking to convenient locations.

IV. CITY DEPARTMENT COMMENTS

Design Review Committee

The Design Review Committee (DRC) reviewed this proposal at their public meetings on September 8 and September 29, 2011.

At the meeting on September 8 the architect discussed changes that the design team was working through. The DRC asked that the flat metal panels on the cinema façade and the connection between the retail floors and cinema mass be further refined. They also asked for a perspective view of the proposal to understand how all of the pieces of the building connect with one another and how the building will be viewed from the surrounding area.

The DRC made the following comments and recommendations at the September 29 meeting.

- There are too many different types of volumes integrated into the building. Some of them work well and others do not.
- Break up some of the “brick framing” for the retail on the ground floor and connect the retail level with the cinema above.
- The trellis design proposed for the cinema terrace is foreign to the rest of the design. This outdoor space could add some interest to the building.
- The circular sign band that wraps the corner at “Main Street” and “C Street” needs to be more substantial in its mass.
- The metal panels need to be broken down to reduce the cinema mass.
- The far right side of the “D Street” elevation feels like it is floating.
- Making some of the garage wall solid would help to ground it.
- The “D Street” elevation feels very heavy and monolithic. There may be opportunities to add windows strategically on this elevation to break it up.
- A different material than brick on the lower half of the elevation may improve the appearance of the building and make it more contemporary.

Traffic and Parking

Traffic and Parking has reviewed the Proposed Block 3 Development Program within Assembly Square. The developer’s Transportation Consultant, Vanasse, Hangen, Brustlin, Inc (VHB) has submitted a Transportation Memorandum relative to a traffic assessment of this proposed development.

Traffic and Parking concurs with the conclusions of the proposed development that Block 3 will readily be able to accommodate the traffic generated by this use, as well as the other planned uses of the overall PUD project site.

However, Traffic and Parking had concerns relative to the turning radius of trucks entering and exiting the loading dock. VHB has submitted supplemental documentation that these turning movements are accepted as standards in the Traffic Engineering Industry. Traffic and Parking defers to VHB in this analysis.

Traffic and Parking has no objections to the submitted proposal concerning the Block 3 Assembly Square Mixed Use Redevelopment Project.

Office of Sustainability and Environment

Office of Sustainability and Environment has not yet provided comments.

City Engineer

The City Engineer has not yet provided comments.

Fire Prevention

At this time, Fire Prevention's requirements for Block 3 include complete fire sprinkler and standpipe systems, an approved fire alarm system, a radio master box, and 24 hour monitoring by an approved central station company for each building. All of which must be 100% complete before any occupancy is allowed. There maybe additional requirements attached to the permits pending review of more specific information that will need to be submitted before Fire Prevention's approval. Before the review of the details information regarding the life safety equipment the street addresses must be assigned by the Engineering Department.

Lights & Lines

Lights & Lines has reviewed the plans and does not have comments at this time.

Bicycle Commission Staff

The proposed condition regarding changing the location of the bicycle parking to convenient locations is a reasonable one. It is concerning that there is no indoor bike parking on the ground level which might be fine if there were residents in the building but very inconvenient for the general public and probably not used. There should be signage to inform the public where the bike parking is located.

Conservation Commission Staff

The Conservation Commission Staff has reviewed the Assembly Square plans and have no comments. As long as there is no work done within the 100 foot protected buffer of the river then there is no reason to submit a Notice of Intent (NOI). If any of these construction projects drain directly into the 72 inch outfall pipe that is being constructed then they must also submit an NOI to the Conservation Commission.

Ward Alderman

Has been contacted but has not yet provided comments.

V. PUBLIC COMMENTS

Planning Staff will edit the report to provide any updated public comments should the Planning Board chose not to act on this case on October 20, 2011, thereby allowing public comments to be incorporated into the report and the conditions, if applicable. As of October 13, 2011, the Planning Staff has not received any comments on this project.

VI. STAFF FINDINGS FOR SPECIAL PERMIT WITH SITE PLAN REVIEW-A

A. General Application Requirements

Application requirements are identified in Section 16.8 of the SZO. Section 16.8.2H identifies that the general information required for a special permit under Section 5.2 is also required at a preliminary level. Staff finds the SPSR-A meets the application submittal requirements in the above listed sections. Detailed findings are contained in Appendix A.

B. Required Findings of Fact for PUD

Section 16.10.1 of the SZO indicates that PUD preliminary master plan approval shall be considered preliminary approval that recognizes that the plan is in general accordance with provisions of this ordinance. Findings are then required under 16.1, 6.4.1, 6.4.3, 16.4, and 16.7 of the SZO. The ASMD further requires findings to meet development standards and design guidelines under 6.4.7 and 6.4.8. The Planning Board determined that the PMP met the required findings for a PUD-PMP, but indicated that some issues would require further review at the SPSR-A submittal. The staff has reviewed these required findings as they relate to the SPSR-A application and find that these findings have now all been met. Detailed findings are contained in Appendix B.

C. Requirements for SPSR and SP (SZO §5.2.5 and 5.1.4)

The SZO requires that the PMP be reviewed to ensure that projects under the PMP can meet the standards required for SPSR-A in the ordinance. Section 6.4.9 requires that the requirements in Section 6.4.9C as well as parts a-h of Section 5.2.5 must be addressed when SPSR-A requests are submitted. The Staff finds that projects submitted for SPSR-A under this PMP meets the findings required as identified in Appendix C.

The SZO requires that the requirements in Section 5.1.4 are addressed when Special Permit requests are submitted. The Staff finds that the special permit for signage meets the findings required as identified in Appendix C.

D. Waiver Standards (SZO §6.4.12, 16.5.4 and 16.5.5)

Section 6.4.12 identifies specific standards that are required for relief from requirements in the ASMD. Section 16.5.4 identifies standards that are required for issuing waivers. Section 16.5.5 identifies a specific standard that is required for waiver of standards of Article 9 (Off-Street Parking and Loading) and Article 12 (Signs) (Section 6.4.14 also addresses signage in the ASMD). Staff finds that the SPSR-A meets these findings, and they are contained in Appendix D.

Staff find that the requested waiver from the requirement in Section 6.4.8B for a three-dimensional model is reasonable given the extent of the three-dimensional computer graphic images provided by the Applicant, which is allowed per Section 5.1.3.

VII. STAFF RECOMMENDATION

Based on the materials submitted by the Applicant and the above findings, the Planning Staff finds that the application for Special Permit with Site Plan Review–A for final level approval of a planned unit development under the Planned Unit Development Preliminary Master Plan approved by the Planning Board on December 14, 2006 and as amended on August 5, 2010 meets the goals of the City for this site, the purposes of the district, and the provisions and purposes of the Ordinance. Therefore, the Staff recommends **CONDITIONAL APPROVAL** of the requested Special Permit with Site Plan Review-A.

Planning staff recommend that the Planning Board grant **APPROVAL** of the Special Permit for signage and the requested waivers for signage and number of loading docks based upon the findings in Appendix E. Planning staff recommend that the three-dimensional model is not required.

To mitigate any potential negative impacts and to provide the best project possible, the Staff recommends attaching to the SPSR-A the **CONDITIONS** in Appendix E. In order to complete this project, the attached PMP-PUD conditions in Appendix G need to be satisfied within the designated timeframe for compliance.

This recommendation is based upon the Special Permit with Site Plan Review-A Application stamped in at the City Clerk's Office on September 22, 2011, as updated, including updated plans:

- EL 0 First Floor Plan; EL 18 Second Floor Plan; EL 40 Third Floor Plan; all dated Oct 4, 2011
- North, West, South, East Elevations dated Oct 4, 2011
- Perspective Views Main St & C Street and Assembly Square Drive & C Street dated Oct 4, 2011
- Signage Package Elevations North, West, South, East dated Oct 4, 2011
- C-2, C-3 Neighborhood Context Map 1 and 2; C-4 Overall Site Plan 1; C-5 Overall Site Plan 2; C-6 Layout and Materials Plan; C-7 Grading, Drainage Plan; C-8 Utility Plan; C-9 Turning Template Plan all dated Sept 30, 2011;
- Open space Summary for the PUD dated Sept 20, 2011.

Approval constitutes an approval the final site plans and building design details for a 417,204 gsf project including 122,967 sf of retail, restaurant, and other commercial uses as approved in the PUD-PMP and a 60,000 sf cinema, along with approx 571 parking spaces in a 4-story garage, two loading bays, and associated service areas. Appendix G addresses the PUD-PMP thresholds that will adjust as the Assembly Row project is built out. Approval is also for retail and parking signage that is indicated on the signage plans. Wayfinding signs and first floor retail signs will be subject to design standards that the Owner submits. Approval does not include the design of the storefronts, which are subject to the design standards document that the Owner will submit. The storefront design and signage are subject to staff review to ensure that the design is consistent with the standards.

The recommendation is also based upon a technical analysis by Planning Staff of the application material based upon the required findings of the Somerville Zoning Ordinance, and is based only upon information submitted prior to the public hearing. This report may be revised or updated with new recommendations, findings and/or conditions based upon additional information provided to the Planning Staff during the public hearing process.

Appendix A: Application Requirements

A.1: Procedures for PUD Applications - Supportive Information (SZO 16.8)					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.8.2.A	A neighborhood context map, at a scale not less than one (1) inch equals one hundred (100) feet, providing a graphic description of the neighborhood in which the tract lies, including roads, utilities and other public facilities, major existing buildings and structures. There shall also be a statement and/or plan as to the general impact of the proposed PUD upon the area, indicating how the PUD relates to surrounding properties and what measures will be taken to create appropriate transitions and access from the subject property to abutting public properties (i.e. parks, waterfront, etc.) or other neighboring tracts (if applicable)	x			Included in application submission
16.8.2.B	A conceptual site plan drawn to a scale of not less than one (1) inch equaling fifty (50) feet, or series of drawings at the same scale, and any necessary supporting information	x			Included in application submission
16.8.2.C	Analysis of compliance with regulations as to dwelling units per square feet of lot area, height, building coverage, floor area ratio (FAR) and parking requirements	x		x	See Overall Site Plan
16.8.2.D	Names of all property owners within five hundred (500) feet of the PUD boundary	x			Included in application submission

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
16.8.2.E	Explanation of provisions for the landscaping and maintenance of all open space and drainage areas	x		x	See Stormwater Management section in Utility Analysis for maintenance of drainage areas. There will be minimal landscaping on Block 1. There is a condition is a recommended condition relative to preparation of Maintenance Agreement for the PUD. The internal courtyards will be maintained by the Applicant.
16.8.2.F	A traffic analysis and recommendations prepared by a registered professional engineer qualified to conduct such studies, including current traffic counts for streets surrounding the project, analysis of the existing capacity of those streets, projections of the amount of traffic that will be generated by the proposed development, and the ability of the thoroughfare system to absorb the increased traffic without decreasing the level of service below an acceptable level . . .	x			A transportation study was completed with 2006 plan. The amended PMP provides current traffic data for 2010, certifying that baseline conditions have not significantly changed since the existing plan was completed, and therefore establishing that the 2006 report remains valid.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
16.8.2.G	A utilities analysis and recommendations prepared by a registered professional engineer qualified to conduct such studies. Said analysis shall contain an inventory of existing utilities including, but not limited to, storm sewers and drains, sanitary sewers, electrical lines, fire alarm boxes and lines, gas lines/mains, water mains, lighting, curb and gutter, etc. Said inventory shall illustrate utility locations, sizes, diameters, carrying capacity and present load on the system. The engineer's report shall state if the current system is capable of adequately serving the proposed development. If the current utility system is found to be inadequate for the proposed development, the report shall confirm the deficiencies and make recommendation(s) as to the infrastructure improvements necessary to properly service the proposed development and maintain the existing service. The report shall also present a formal plan for infrastructure improvements, documenting timing, funding mechanisms and coordination with the City	x			See Utility Analysis
16.8.2.H	All applicable information required for special permit with site plan review (See Article 5 of this Ordinance). This information may be submitted at a preliminary level, in consideration that PUD approval is a preliminary approval	x			See section A2, below
16.8.2.I	Any other supportive information the applicant feels may be beneficial to the City of Somerville in the evaluation of the request	x			Additional information provided includes design guidelines and supplemental detail on individual plans to later be submitted for SPSR-A review

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
A.2: General Information Required for SPSR Applications (SZO 5.2)					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
5.2.3.1	names, addresses, and telephone numbers of the applicant, the owner if other than the applicant, and other agents for the applicant, such as the architect, engineer and/or attorney, and the name and address of the proposed project	x		x	Included in application submission
5.2.3.2	plot plan certified by land surveyor indicating total land area, boundaries, angles, and dimensions of the site and a north arrow	x		x	The Layout and Materials Plan, certified by Hugh Hahn, PE depicts boundaries, angles and dimensions for the proposed Block 3 project area.
5.2.3.3	scaled site plans certified by a registered land surveyor, architect, landscape architect or engineer showing present and proposed use of land and existing buildings, if any; dimensions of existing and proposed structures; location and dimensions of any easements and public or private rights of way; and at grade parking and loading areas.	x		x	See Overall Site Plan, Layout and Materials Plan, Grading and Drainage Plan, Utility Plan, Building Elevations. The footprint is shown on the Layout and Materials Plan along with a zoning summary chart. There are easements on the site that are shown on the Layout and Materials Plan. The proposal is for 571 garage parking spaces within the building including 15 handicap spaces. The standard parking spaces will be 9 feet by 18 feet, the standard accessible spaces will be 13 feet by 18 feet and the van accessible spaces will be 16 feet by 18 feet. 20 bicycle parking spaces will be onsite. Driveway aisles within the garage will be 22 feet wide.
5.2.3.4	brief written description of the proposed project, such as proposed construction or demolition, all uses, who the project is intended to serve, expected number of employees, and/or occupants and methods and hours of operation, as applicable	x		x	The project is a 417,204 gsf building that will house 112,967 sf of ground floor retail or restaurant space, a 60,000 sf cinema and 571 parking spaces. The number of employees that the retail and cinema will generate is approximately 345. The hours of operation will be 8am to 2am. Block 3

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
5.2.3.5	the total floor area and ground coverage ratio of each proposed building and structure	x		x	The total floor area is 182,914 nsf on a site that is 113,138 for a total FAR of 1.62. There is 6.7% open space on the site, which contributes to the 25.3% of open space for the PUD
5.2.3.6	front, side, and rear elevations			x	See North, West, South, East Elevations dated Oct 4, 2011.
5.2.3.7	existing and proposed contour elevations in two foot increments	x		x	The ground elevations are shown in one-foot intervals on the Grading and Drainage Plan. The project is generally flat with elevations ranging from 11.6 feet to 14 feet. The site is at the same relative elevation as the surrounding area.
5.2.3.8	provisions for vehicular and pedestrian circulation	x		x	See Overall Site Plan and Design Guidelines for basic information. Detailed information regarding the design of streets and sidewalks are a condition of approval for review by the City Engineer and Traffic Engineer. The sidewalks are varying widths along the perimeter of the project. Vehicular access is via Assembly Square Drive, "C Street", "Main Street", and "D Street".
5.2.3.9	color, materials, and exterior features of proposed structures	x		x	The materials will include brick, precast concrete panels, metal panels and metal ribbed cladding. The primary entrance to the cinema will be a glass curtainwall from the street level to the roof height. The secondary corners of the building will be brick walls and piers, decorative cornice lines and fascia. The parking garage will be clad with precast panels and where the garage reaches the corner, it will be clad in brick. The second floor and towers will have metal mullions but the entire garage will be open to the air. The retail facade will vary depending on the tenant and is required to comply with the design guidelines. Block 3 PB 2011-16

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
5.2.3.10	landscaping and screening, including trees, stones, walls, fences, and other features to be retained and removed, as well as color, size, and type of landscaped surface materials	x		x	The lot is currently vacant and none of these features are present on the land. There will be minimal landscaping at the site, which is typical for an urban site. Since parking, loading, and service areas will be within the building, no additional screening is required. A general Treescape Plan is provided for the street trees. Street trees will be reviewed by Planning Director and City Engineer prior to infrastructure construction, but approval shall not be required for trees to be maintained by the Applicant.
5.2.3.11	measures taken to preserve and protect natural resources	x		x	The site is currently a brownfield and the remediation of the soil for the PUD is an improvement to the environment.
5.2.3.12	outdoor lighting, including location and intensity of lighting facilities			x	The lighting will be on the City streets along all four sides of the building. Lighting on City streets will need approval by City Engineer/Public Works prior to infrastructure construction as conditioned. Lighting on the exterior of the building could include wall wash lighting elements strategically placed for a variety of functions such as to accent key monument features, cornices, entries, walkways and loading and service areas.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
5.2.3.13	dimensions and locations of signs, proposed and existing			x	There is no existing signage at the site. The cinema, retail and parking garage signage is on the Signage Diagram Elevations. The Applicant is seeking a Special Permit for Signage to waive the height and size limits the signs on the Assembly Square Drive side of the building. The cinema and two retail signs on are a total of 1,176 sf and the allowance is for 614 sf and they will be at a height of 70 feet. The ground floor retail signage will be dictated by the tenants; however, a condition of approval is that the Applicant provide a design guideline for all signage within the PUD area for review by the DRC and approval by the Planning Board prior to issuance of a building permit for this block.
5.2.3.14	location and significance of historic structures	x		x	This has been addressed in the 2005 VHB study and included in the original PMP document. No properties included in the State or National Registers of Historic Places are located within the project limits.
5.2.3.15	method for handling solid waste disposal, and for screening of disposal facilities			x	A licensed private contractor will pick up solid waste disposal and recycling. Dumpsters and compactors will be located within the building and will not be visible from public view.
5.2.3.16	description and location of all proposed mechanical and electrical system components, including exhaust and ventilation system, transformers, and satellite dishes			x	Electrical system components will be located in the interior of the building footprint off of Assembly Square Drive. Major mechanical equipment will be located on the roof behind screened enclosures where necessary. Retail kitchen exhaust will vent through the roof. Retail fresh air makeup will be integrated into the building elevation. Block 3 PB 2011-16

October 17, 2011

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
5.2.3.17	locations of and adequacy of existing and proposed on-site public utilities, facilities, and conditions (water, sewerage, and drainage), showing size and direction of flows	x			See Existing Conditions Plan; Utility Analysis; Layout and Materials Plans. The proposed utilities and drainage systems for Block 3 are shown on the Grading and Drainage Plan and on the Utility Plan. The utility infrastructure improvements including water, sewer and drainage within Assembly Square Drive have been designed in conformance with the Master Plan that has received previous local and state approvals.
5.2.3.18	demolition and construction procedures including impact mitigation measures; an estimate of the time period required for completion of the development			x	The proposal does not require demolition. Conditions of approval will address construction impacts. The estimated completion date for the project is late 2013 or early 2014.
5.2.3.19	a traffic study including estimated peak hour traffic volumes generated by the proposed use in relation to existing volumes and projected future conditions or, if the project is twenty-five thousand (25,000) square feet or more, a traffic impact analysis which is prepared by a professional traffic engineer	x			The transportation study was completed with 2006 plan. The amended PMP provides current traffic data for 2010, certifying that baseline conditions have not significantly changed since the existing plan was completed, and therefore establishing that the 2006 report remains valid. Individual projects will need to address local traffic impacts and conflicts with SPSR-A application, but will not require additional study of off-site traffic impact if total impacts remain within the established thresholds. Block 3 trip generation has been slightly reduced from the 2006 plan and therefore another traffic study is not necessary.
5.2.3.20	general summary of existing and proposed easements or other burdens now existing or to be placed on the property	x		x	See Existing Conditions Plan; ROW Plan. There is a 20-foot wide existing driveway easement exists on the site that is to be revised or abandoned.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR- A	Comment
5.2.3.21	wetlands, ponds, and surface water bodies, as defined under the Wetlands Protection Act, M.G.L. Chapter 131, Section 40, and rules promulgated thereunder, 310 CMR 10.00	x			See Existing Conditions Plan. There are no wetlands on the project area.
5.2.3.22	photographs of at least eight (8) by ten (10) inches, showing the development site and surrounding parcels	x		x	Included in application submission
5.2.3.23	names and addresses of all property owners within three hundred (300) feet of site boundaries	x		x	Included in application submission. Staff generated a current list.
5.2.3.24	such other information as will aid the SPGA in judging the application and in determining special conditions and safeguards, and as the SPGA should deem necessary, in its determination of completeness of said application as provided in Section 5.3.1 and the SPGA Rules and Regulations	n/a			n/a

Appendix B: Required Findings of Fact for PUD

B.1: General Findings under Section 16 (SZO 16.9 and 16.1)					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.9	The SPGA shall review and determine whether a PUD application is complete and place special emphasis in its review as to PUD compliance with provisions of Article 16 herein, including compliance with the purpose and general requirements/features of a PUD	x			See Appendix A. Applicant has provided a complete application. See the remainder of Appendix B which establishes that Applicant has provided an application that is in compliance with the provisions of Article 16 and complies with the purpose, general requirements and features of a PUD.
16.9	The SPGA shall . . . determine whether the proposal is consistent with the most suitable development of the City, and conduct a review in accordance with the requirements for special permit with site plan review as set forth in Article 5 of this Ordinance. The PUD shall comply with all requirements of this Ordinance unless a deviation from these strict requirements is authorized herein in Article 16	x			The proposal to reuse a brownfield next to the Orange Line for a transit-oriented mixed-use, green development is consistent with the most suitable development in the City. It is based upon a long-term set of principles established by the City for redevelopment of the Assembly Square area in the ASD Plan. The applicant requested two waivers for the waiver to allow for underground parking that will not be visible from the surface streets and for two residential buildings to be built up to 90 feet in height less than 250 feet from the Mystic River, and a waiver from the requirement to submit a three-dimensional model, which is addressed in Section IV-D of this decision.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.1	<p>The purpose of a Planned Unit Development, or PUD, is to provide for a mixture of land usage at designated locations at greater variety, density and intensity than would normally be allowed . . . to achieve, to the greatest possible degree, land development responsive to an analysis of the environmental assets and liabilities of a site, both natural and man-made. A PUD should be a well-integrated development in terms of land uses, functional activities, and major design elements such as buildings, roads, utilities, drainage systems and open space. A PUD is allowed greater design flexibility so that larger-scale site and master planning for a development may protect natural features and consider most fully the surrounding land use and development context . . .Development should be concentrated in the most suitable and least environmentally sensitive areas of the landscape. Preservation and enhancement of open space is strongly promoted.</p>	x			<p>The proposed project has benefited from an additional 4 years of work by the applicant in collaboration with the City and community stakeholders since the original 2006 PMP. The result is a plan for a vibrant, mixed use, urban neighborhood and commercial center providing 9,000 new jobs, increased tax revenues, market rate and affordable housing, improved access to transportation, improvements to regional stormwater systems and enhanced open space amenities. The project mixes uses, provides urban densities, develops according to environmental constraints and opportunities on the site, while creating a group of urban blocks that concentrate development with the highest densities near the transit station, mid-rise buildings fronting on the Mystic River parks, and expanded open space. The project meets this finding.</p>

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
<u>B.2: Consistency Findings (SZO Section 6.4)</u>					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.1	Purpose. The Assembly Square Mixed-Use District (ASMD) has been enacted to encourage the best use of Assembly Square physically, economically, environmentally and socially while promoting the best interests of residents of the City. The ASMD is intended to fulfill the goals and objectives contained in the Assembly Square District Plan (the ASD Plan, as hereinafter defined). The ASMD zoning is designed to allow the district to reach these goals.	x			See comments under Section 6.4.4 below.
6.4.4	The ASD Plan describes the physical characteristics of the ASMD. The ASD plan establishes a comprehensive plan for development in the ASMD. The ASD plan includes the <u>Assembly Square Planning Study</u> dated October 2000	x			The Assembly Square Planning Study prepared by the Cecil Group in 2000 created a framework for development in the Assembly Square area over the next twenty years and beyond. This Planning Study encouraged mixed- use development, but also recognized that a certain amount of big box retail would be the most feasible use in Assembly Square in the immediate future. The Planning Study specifically supported the redevelopment of the Assembly Square Mall and the proposed new IKEA store to improve Assembly Square’s visibility and image, helping to pave the way for more intensive office development in the future. While the ASD Plan’s site layout was based upon the ownership arrangement before the IKEA land swap, the general principles and concepts of the plan are supported by the proposed PMP amendment, and this PMP includes all of the physical characteristics, values and goals that were addressed in the Planning Study.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.4	The ASD Plan describes the physical characteristics of the ASMD. The ASD plan establishes a comprehensive plan for development in the ASMD. The ASD plan includes the <u>Assembly Square Revitalization Plan</u> dated 2002	x			The Assembly Square Revitalization Plan is an approved Urban Renewal Plan under MGL 121B. The 2002 plan is a Major Plan Change to the 1980 Assembly Square Revitalization Plan -- the City's urban renewal plan for Assembly Square. The Major Plan Change built on the foundation of the Cecil Group's Planning Study. The Major Plan Change envisioned a mixed use district with office, retail, residential, cinema, hotel, and restaurant uses – a vibrant 24-hour district with a density somewhere between Boston's density and level of density in nearby suburbs. The Major Plan Change also envisioned the redevelopment of the Assembly Square Mall and a new IKEA store. The PMP revision is consistent with the overall vision of the Revitalization Plan. Upon approval of this revised Master Plan, the Redevelopment Authority intends to amend the Revitalization Plan to reflect the latest redevelopment plan as outlined in this PMP and the FEIR.
6.4.4	The ASD Plan describes the physical characteristics of the ASMD. The ASD plan establishes a comprehensive plan for development in the ASMD. The ASD plan includes the <u>Assembly Square Design Guidelines for the Public Realm</u> dated 2002	x			<p>Overall, the revised PUD PMP is consistent with the Public Realm Guidelines. The PUD's four key principles closely align with the goals of the Public Realm Guidelines; both encourage design that supports the PUD's public spaces and achieves sense of place, multi-modal functionality, and 24-hour activity. Both documents give streetscapes and public spaces high priority, stressing the role these spaces play in the framework of the PUD. Both establish street hierarchies and district gateways for orientation. The PUD PMP is also consistent in its recognition of the Mystic River as a regional amenity, maximizing pedestrian accessibility to the waterfront. The Public Realm Guidelines generally include a greater level of streetscape and building detail, while the PUD PMP establishes complementary detailed design guidelines to drive decisions made at the SPSR-A phase and during streetscape design.</p> <p>For example, the Public Realm Guidelines call for a unified signage system that considers elements like sign character, placement, materials, and typestyle. This issue is addressed through inclusion of a condition that a sign design guideline be established. The Public Realm Guidelines also place emphasis on creating physical and visual connections between the PUD and its surrounding neighborhoods. The Applicant is undertaking several significant transportation improvements to enhance multi-modal access to the site. These efforts are especially important along the PUD's outer edges.</p> <p style="text-align: right;">Block 3 PB 2011-16</p>

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.4	The ASD Plan describes the physical characteristics of the ASMD. The ASD plan establishes a comprehensive plan for development in the ASMD. The ASD plan includes the <u>Assembly Square Transportation Plan</u> dated 2003	x			The Assembly Square Transportation Plan generally calls out for development of a street grid within the mixed-use area. That grid has changed with the relocation of IKEA, but the overall transportation strategy in the PMP meets the spirit of the original Transportation Plan.
<u>B.3: General Requirements of a PUD (SZO Section 16.4)</u>					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.4a	a designated tract of land meeting the minimum lot size requirements of Section 16.5.1.a for the PUD district	x			The parcel size is 2,896,740 s.f., or approximately 66.5 acres. This exceeds the 20,000 SF minimum lot size required for the PUD-A in the ASMD.
16.4b	developed in a comprehensive, design-integrated manner, according to an overall master plan, with two (2) or more types of use	x			The Applicant has submitted a revised Master Plan with supporting plans showing buildings and roadways prepared by the architectural firm of Streetworks, Inc. and the engineering firm of Vanasse Hangen Brustlin, Inc. The PUD includes the following uses: retail (including restaurant and cinema), commercial (including office, R&D, and other commercial uses), residential, hotel, and parking. This revision to the Preliminary Master Plan is addressing the third phase of the development with the IKEA site and the Marketplace having received prior SPSR-A approval. The two prior phases have been approved based on the original Master Plan which has allowed the project to be developed in a comprehensive, design-integrated manner and this current application would improve the original plan and provide further clarity and regarding the Assembly Row development.
16.4c	consistent with the objectives of this Ordinance;	x			The Applicant has utilized the increased height and FAR allowed under the PUD Ordinance, proposing buildings ranging from 8 to 23 stories with a maximum height of 250 feet. By contrast, the maximum height permitted as of right is only 40 feet. The proposed PUD has been designed so that each phase, the Marketplace, IKEA and Assembly Row functions well on its own and also in relation to other phases. With Assembly Row, the applicant has the flexibility to design and construct residential, retail and/or commercial, or a mix of all, in response to the market and to other development taking place in Assembly Square.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.4d	consistent with the goals, objectives and plans of the City for the general subject area	x			The goals, objectives, and plans of the City for Assembly Square have been expressed in various public documents. Section B2 of these findings identifies in more detail how the proposed PUD is consistent with these documents. The previous PUD approval in 2006 met the goals and objectives of these documents and this revision is a refinement of the original PUD approval. The DRC reviewed the Design Guidelines for Assembly Row which provide greater clarity regarding the future development to take place on the site. The DRC's comments have been included in the PUD-PMP report.
16.4e	developed so as to locate or cluster development sites, especially buildings, in a manner that provides usable open space, preserves natural or historic features, and preserves views of such features to the maximum extent possible	x			The PUD is oriented around a series of open spaces connected by pedestrian friendly streets. Main Street has been oriented to preserve a view of the Mystic River. The Applicant will widen the existing DCR park as part of the PUD, and this new, expanded park will serve as an anchor to the north end of Main Street. The new park will be lined with a cluster of residential/retail buildings to give it an active edge and it is expected to serve as a place for public enjoyment of the river. Throughout the site, the Applicant proposes to construct a series of additional passive pocket parks for residents, shoppers, office workers, and visitors. Other than the riverfront, Assembly Square does not have any important natural or historic features to be preserved. During SPSR-A review for each component of the Master Plan, the provision of usable open space and the preservation of views will continue to be monitored by the Planning Board, and this Decision includes conditions regarding the Applicant's obligation to submit detailed information for each Special Permit application.
16.4f	an efficient use of land which properly considers topography and protects significant natural features including, but not limited to, waterways, wetlands, floodplains and wildlife	x			The existing site is relatively flat, except for the area near the water, where the land slopes to the river. Although there are some former tidelands in Assembly Square (which will subject the project to Chapter 91 review), there are no significant wetlands, floodplains, or wildlife. The most important natural feature is the Mystic River, and the PUD will enhance passive recreational elements of the DCR park, as expanded, with landscaping, public artwork, and associated improvements consistent with a first-class commercial standard for urban public space. Finally, the PUD has been designed to locate the tallest buildings furthest away from the Mystic River.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.4g	an efficient use of land demonstrating full coordination of its own site development including, but not limited to, the land uses and functions contemplated, architecture, open space and pedestrian networks, vehicular access and circulation, and all other infrastructure	x			The Master Plan demonstrates that full consideration has been given to site development as a whole. The project has been phased such that the proposed uses and their associated roadways, parking, and infrastructure are developed in a coordinated manner. During the Special Permit process for developments within Assembly Row, the architecture, open space and pedestrian networks, vehicular access and circulation, roadways, and infrastructure will be reviewed in appropriate detail, and this Decision includes conditions to ensure that these issues are more fully addressed during the Special Permit process.
16.4h	linked and coordinated with surrounding land uses, off-site public facilities, infrastructure and roadway access where appropriate, in a manner that is safe, efficient and non-injurious to the public, and an improvement or benefit to the public where possible	x			The Applicant has linked the residential buildings with the existing parkland that abuts the site and has designed a network of roadways and sidewalks which constitute an improvement to the existing conditions and a benefit to the public. During the special permit process links with surrounding land uses, off-site public facilities, infrastructure, and roadway access will be reviewed in appropriate detail. Conditions have been attached to this Decision to ensure that these issues will be fully addressed.
16.4i	designed with sizing of street and other infrastructure systems to accommodate the overall service demand of the PUD	x			A full Traffic Impact and Access Study was prepared for the project and was included in the original submission package. The applicant is claiming that neither the underlying traffic conditions near Assembly Square nor the Project itself have changed to the degree that a new Traffic Impact and Access Study is required. The City Traffic engineer concluded that all facets of intersections and roadways illustrated on the revised Master Plan are consistent with proper Traffic Engineering design practice. Recommendations for traffic mitigation and additional analysis are included in the Conditions section of this report.
16.4j	inclusive of provisions for the ownership and maintenance of usable open space as appropriate (see Sec. 16.6 of this Article)	x			The Applicant will be required to maintain the usable open space within the PUD subject to a maintenance agreement that must be developed as a condition of this approval.
16.4k	inclusive of appropriate deed restrictions or covenants requiring compliance of all development with the PUD master plan, and any architectural or other guidelines or standards			x	No deed restrictions or additional covenants beyond the maintenance and open space covenants are required for this site. The existing covenant from December 2006 remains in effect.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.4l	when inclusive of a proposed use allowable under this Ordinance only within a PUD setting, that said use is integrated into the proposed development in terms of function and service to other users of the PUD site and/or to the immediately surrounding area	n/a			<u>Not applicable.</u> This finding is not applicable in the ASMD District because all uses in the PUD align with the underlying district.
<u>B.4: PUD Design Guidelines (SZO Section 16.7)</u>					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.7a	PUD architecture should demonstrate the cohesive planning of the development and present a clearly identifiable design feature throughout. It is not intended that buildings be totally uniform in appearance or that designers and developers be restricted in their creativity. Rather, cohesion and identity can be demonstrated in similar building scale or mass; consistent use of facade materials; similar ground level detailing, color or signage; consistency in functional systems such as roadway or pedestrian way surfaces, signage, or landscaping; the framing of outdoor open space and linkages, or a clear conveyance in the importance of various buildings and features on the site			x	The form of the building has changed since the design guidelines were created that were approved as part of the revised PUD-PMP. The 8-story hotel will not be built on this Block and the cinema floor plate has been rotated shifting the parking garage to floors two through five along the Assembly Square Drive side of the building. The design guideline for Block 3 has been altered to reflect this change and ensure that the proposal is comparable to a guideline that is consistent with the PUD-PMP. Details of how the building conforms to the guidelines can be found in the form and design section of the staff report.
16.7b	Buildings adjacent to usable open space should generally be oriented to that space, with access to the building opening onto the open space			x	The usable open space on Block 3 is generally the sidewalk surrounding the building. There will be a more substantial usable open space on Block 2 that will serve as an entrance plaza to the Mystic River where the north end of "Main Street" meets the waterfront park. This open space is to the northeast of Block 3. The significant glass cinema entrance will be visible from and at the closest point to Block 2.
16.7c	When a building is proposed to exceed the base district height limit, it is intended that buildings be of slender proportions emphasizing the vertical dimension			x	The Design Guidelines submitted in the application adhere to the height requirements outlined in the ASMD dimensional requirements with specific height limits based on the distance from the Mystic River bank and the MBTA station. The building on Block 3 is 79 feet, 6 inches feet tall. Vertical elements include towers, bays and vertical configuration of windows.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.7d	It is strongly encouraged that landscaped space, and particularly usable open space, be designed and located to connect as a network throughout the PUD. It is also generally intended that said space be designed and located to connect with existing off-site usable open space, and provide potential for connection with future open space by extending to the perimeter of the PUD, particularly when a plan exists for the location and networking of such future open space	x			see 6.4.7.A.4
16.7e	It is intended that no non-residential structure cause a casting of any shadow on any residential lands between 10:00 AM and 2:00 PM, solar time, on the vernal equinox (March 21); and that any shadow cast by a PUD structure on public usable open space be of minimal impact on the desired functional use of said open space, particularly in the period from March 21 to September 21			x	Shadow studies were submitted for the block for 10am and 2pm on Mar 1, Sept 21, Dec 1. The majority of the shadow at 10am will cast a shadow on the sidewalk of Block 1, except that the Dec 21 10am timeframe has a shadow that reaches farther into Block 1. The majority of the shadow at 2pm will cast a shadow on the street. The Dec 21 2pm shadow projects over a portion of the open space at Block 2, the southeast corner of Block 1 and the northwest corner of Block 4. The shadows are minimal to the open space between March 21 and Sept 21.
16.7f	Vehicular access to and from public roads is intended to be consolidated. Vehicular access to PUD lands from a public roadway shall generally be limited to one (1) access point, particularly when PUD frontage along said roadway is three hundred (300) feet or less. When a PUD has more than six hundred (600) feet of frontage on a public road, separation between existing, approved, and proposed curb cuts, whether on or off-site, shall average a minimum of two hundred (200) feet. Consolidation to a minimal number of access points is strongly encouraged	x			Vehicular access to this area is primarily provided though Assembly Square Drive, but also through New Road/IKEA Way and Foley Street by way of Middlesex Avenue. The PUD guidelines encourage consolidation of access points to and from PUD lands and a minimum of 200 feet between access points. This proposal meets this guideline while still offering optimal transportation access to the site, and a robust street grid to handle traffic within the site.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.7g	Internal PUD streets shall consist of local and collector roadways, designed in accordance with standard traffic engineering practice. Any street proposed for public dedication shall meet the standards of the City's Director of Traffic and Parking.	x			The internal street layout is proposed in a grid pattern with local and collector streets. The main retail street travels north/south through the center of the Assembly Row development between IKEA Way and the park land adjacent to the Mystic River, supporting a robust street grid that can handle traffic within the site. Other internal streets provide connections to Assembly Square Drive, the MBTA station and perimeter locations. As these streets will be dedicated to the public these streets will be conditioned to meet City standards or better pursuant to review by the Director of Traffic and Parking and City Engineer.
16.7h	PUD block sides should reflect average city block size of Somerville, to maximize a pedestrian-friendly scale in the street grid. Alight streets to give building energy-efficient orientations.	x			Block sizes are larger than typically found in Somerville to accommodate buildings much larger than are typical in the City. Though the blocks are larger, the ground floor retail uses proposed and pedestrian friendly architectural elements and designs that would be required during the Special Permit review process will offset the negative effects of the above average block sizes and provide a scale appropriate for pedestrians.
16.7i	The PUD design should preserve and enhance natural features such as topography, waterways, vegetation, and drainage ways.	x			The natural features of the site have been substantially altered over the years as an industrial and commercial site. This proposal would expand and improve vegetation on the site as well as expand the open space existing along the Mystic River.
16.7j	The PUD design should minimize impervious surfaces and incorporate other design features to minimize storm water runoff.			x	Stormwater from the top level of parking on the garage roof will be treated by oil grit separator to pretreat runoff prior to discharge to the roadway stormwater management system. The treatment of runoff from the site will be provided in the roadway storm drainage system by water quality units in Assembly Square Drive and "F Street".

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
16.7k	PUDs should maximize pedestrian transit-oriented development. Specifically they should use "traffic-calming" techniques liberally; provide networks for pedestrians as good as the networks for motorists; provide pedestrians and bicycles with shortcuts and alternatives to travel along high-volume streets, and emphasize safe and direct pedestrian connections to transit stops and other commercial and/or employment nodes; provide long-term, covered, bicycle parking areas; provide well-lit, transit shelters; incorporate transit-oriented design features; and establish Travel Demand Management programs at employment centers.	x			Traffic calming measures have been included in the roadway designs that feature combination pedestrian/vehicle streets and open spaces, traffic circles, paver cross walks, intersection bumpouts and street trees. Pedestrians and bicyclists have alternative networks to access the project without travel on the high volume streets and can bypass the entire project on a dedicated bike/pedestrian path around the perimeter of the site. The highest intensity development will be proximate to the MBTA station which will promote rapid transit ridership and is in line with ideals of Transit Oriented Development.
16.7l	Make shopping centers and business parks into all-purpose activity centers.	x			The proposal calls for a wide array of uses that would create a vibrant and sustainable community with amenities and activities that will serve the residents of the development and the surrounding areas. This project is much more integrated than a typical shopping center or business park, allowing for a new community to be developed adjacent to the new T station.

<i>Section</i>	<i>Required Finding</i>	<i>Met in PUD</i>	<i>Not Met</i>	<i>Met in SPSR-A</i>	<i>Comment</i>
<u>B.5: ASMD Development Standards (SZO Section 6.4.7.A)</u>					
<i>Section</i>	<i>Required Finding</i>	<i>Met in PUD</i>	<i>Not Met</i>	<i>Met in SPSR-A</i>	<i>Comment</i>
6.4.7.A.1	<i>Transportation Analysis.</i> All new Developments shall conform to the requirements set forth in any Transportation Study, subject to the approval of the SPGA.	x			A full Traffic Impact and Access Study was prepared for the project and was included in the original submission package. The applicant has provided data indicating that neither the underlying traffic conditions near Assembly Square nor the Project itself have changed to the degree that a new Traffic Impact and Access Study is required. The Traffic Engineer indicated that all facets of intersections and roadways illustrated on the revised Master Plan are consistent with proper Traffic Engineering design practice. Recommendations for traffic mitigation and additional analysis are included in the Conditions section of this report.
6.4.7.A.2	<i>Parking Requirements.</i> Developments shall meet the parking requirements set forth in Section 9.15.	x		x	The minimum number of spaces for this development is between 183 and 306 parking spaces for the commercial use depending on the breakdown of retail and restaurant uses. The requirement is met with the proposed 571 parking spaces. Utilization of parking spaces between two uses may be flexible or if parking is underutilized, the space may meet the demand of future development without building more parking. The minimum number of bike parking spaces is 18, which will be provided in the building.
6.4.7.A.3	<i>Landscaping Requirements.</i> Developments shall conform to the applicable landscaping requirements set forth in Article 10. Open spaces shall be contiguous to the extent practical, in the opinion of the SPGA.			x	There will be minimal landscaping at the site, which is typical for an urban site. Landscaping across the Assembly Row site is concentrated in publically accessible well programmed public space. There is opportunity for individual retailers to provide planters, flower boxes and other types of landscaping in front of their storefront.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.7.A.4	<i>Pedestrian Connections.</i> Continuous pedestrian connections shall be supported between all major points of pedestrian activity on the Development Site, including, but not limited to, connections to the Mystic River waterfront, connections to all public and private ways abutting the Development Site, and any transit stops. Developments shall support improved access between the ASMD and the Ten Hills and East Broadway neighborhoods by means of sidewalk connections, crosswalks, landscaping, traffic signalization and traffic calming methods as appropriate.	x			The project incorporates sidewalks throughout, connecting all parts of the development including to and from the proposed MBTA T stop, the Mystic River and the Assembly Square Marketplace. In addition, a shared use path is planned along the Orange Line right of way that will connect pedestrians along the length of the project to the riverfront. The enhanced riverfront park also provides enhanced and new pedestrian connections to Draw 7 Park and to points within the site. The Proponent has previously provided \$100,000 to the City for the design of a new Mystic River pedestrian/bicycle walkway underneath Route 28 connecting Assembly Square and the Ten Hills neighborhood. The Proponent has also committed to fund construction of the new Mystic River pedestrian/bicycle walkway underneath Route 28 as part of an up to \$2 million commitment to fund pedestrian/bicycle/riverfront park enhancements on DCR land, in addition to other mitigation being constructed by the Proponent in conjunction with the Project.

B.6: ASMD Design Guidelines (SZO Section 6.4.7.B)

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
----------------	-------------------------	---------------------------	--------------------	--------------------------	----------------

Note: The applicant has provided, of its own volition, additional Design Review Guidelines to address the design and massing of the proposed blocks and buildings. The of quality in material and design that will achieve the goal of creating a diverse and vibrant mixed-use neighborhood they in no way represent the only viable or acceptable

6.4.7.B.1	<i>Street and Sidewalk Design.</i> Street and sidewalk design shall be based on the Assembly Square Public Realm Design Guidelines and applicable engineering standards, provided that any street shown in such Guidelines as running through an existing Building is not required to be constructed until such Building is demolished.			x	The design of streets and sidewalks will respond appropriately to the Street and Sidewalk design criteria. To the extent that is known at this time, the streets and sidewalks appear to be designed to meet the expectations of the Design Guidelines. Full engineering plans will need to be provided for review and approval prior to a building permit being issued for the block to ensure that streets meet City engineering standards. There are not existing buildings that need to be demolished to construct the streets around the site.
-----------	---	--	--	---	---

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.7.B.2	<i>Building Design.</i> Buildings shall be designed to the highest architectural standards and shall be sited appropriately on the Lot.			x	The design has been reviewed by the Design Review Committee and staff and it complies with the design guidelines as detailed in the staff report.
6.4.7.B.2a	Buildings should be located to create a presence on existing street edges or along major internal circulation routes and have maximum building setbacks of five feet except in special circumstances, where greater setbacks would enhance the pedestrian friendly experience of the ASMD, such as dedicated open space; and buildings should be located to reinforce both existing and future circulation patterns that may serve more than one Site.			x	The building will have a presence on the street. The building is between 14 to 19 feet from the property line to create wide sidewalks around the building except that the cinema lobby projects into the sidewalk width to create a prominent entrance and interest to the building.
6.4.7.B.2b	Buildings should have interesting entrance areas that are visible and directly accessible from major public access points, streets and circulation patterns. Extensive areas of glass and window, providing visual access to interior uses, should be part of all street facades and accompany building entrances. Multiple and frequent entrances oriented to streets are encouraged. Building entrances should be clearly defined, through the use of elements such as canopies, porticos, overhangs, peaked roof forms, arches. Entries set back from the street should have outdoor patios, tile work, moldings, integral planters or wing walls with landscaped areas, or places for sitting.			x	The cinema entrance will be a glass structure that will provide views into the lobby and movement on three escalators. The storefronts will be on all four sides of the building and will provide interesting entrances that will be unique but within the design guidelines.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.7.B.2c	There should be a clearly defined pattern of bays, rhythms, and dimensions that create continuous visual interest and variety in the design of all facades.			x	There are a variety of materials proposed for the façade including brick, glass, metal, and precast concrete panels. The material changes particularly where a major tenant entrance and pedestrian entries to the garage parking to achieve this finding to ensure variety in the design of the facades. The massing of the cinema auditoria is broken down by setting back from the main facade, utilizing ribbed metal cladding, and inserting horizontal elements.
6.4.7.B.2d	The overall scale of development should be broken down to respond to the pedestrian scale use of open space.			x	The ground floor retail surrounding much of the building, a second floor retail lobby entrance, two pedestrian garage parking entrances and sidewalks surrounding the building make it a pedestrian friendly building. The parking, loading and trash/recycling areas are internal to the block and away from pedestrian access to the building.
6.4.7.B.2e	Materials and colors shall be consistent with traditional buildings in the area with historic merit.			x	Two buildings in the Assembly Square area were inventoried by the Massachusetts Historical Commission and were not deemed to have historic merit. One of the buildings was demolished for the IKEA store and the other will be demolished.
6.4.7.B.2f	Building equipment and service areas should be located away from public streets or major interior circulation routes and provide screening. All storage of items for sale or related inventory should be enclosed unless completely screened from public view with architectural elements meeting the §6.4.7 guidelines.			x	All of the building equipment and service areas have been located in the middle of the block and are screened by the building and by an overhead door. The mechanical equipment on the roof will be screened.
6.4.7.B.2g	Preference should be shown for vertical integration of uses. Developments should ensure that development patterns provide active uses on the ground floor that take advantage of the waterfront views and open spaces, and that add presence to public ways and sidewalks.			x	The building will have a vertical integration of uses with retail on the first two floors, a cinema on the third floor and parking on floors 2-5. The retail use on the ground floor is an active use with a lot of windows that provide presence to the public ways and sidewalks. There will be no parking on the ground floor as originally contemplated in the PUD-PMP, making a more active first floor than was originally proposed.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.7.B.2h	The façade of a building should not have any uninterrupted or unfenestrated length exceeding thirty-five (35) horizontal feet. Facades greater than one hundred (100) feet in length, measured horizontally, should incorporate wall plane projections or recesses having a depth of at least three percent (3%) of the length of the facade and extending at least twenty percent (20%) of the length of the façade.			x	There are no stretches of the façade that exceed 35 feet in length and are uninterrupted or unfenestrated . The metal panels on the cinema facade will be further defined to be broken up more than they are currently in elevation. The retailers will design their own space which will provide variety to the façade. The upper stories do not have lengths of greater than 100 feet in length that are flat and do not project or recess from the main facade. Again, the metal panels on the cinema facade will be further defined to comply with this requirement.
6.4.7.B.2i	All Ground Floor facades that face public ways or the Mystic River should have windows providing visual access to the interior of a space, arcades, display windows, entry areas, awnings, or other such features along no less than seventy percent (70%) of their horizontal length. Forty percent (40%) of this activated facade area+ on the ground floor of building walls along primary and secondary streets shall consist of windows or doors meant for public entry and exit.			x	This guideline will be met with the amount of retail storefronts that will provide large expanses of window and doors meant for public entry and exit.
6.4.7.B.3	<i>Parking Lot Design.</i> Refer to Section 9.15 for parking requirements. Parking Lots shall avoid large expanses that are unbroken by Buildings or substantial landscaped Open Spaces, as set forth in Section 10.4 of this Ordinance.			x	Parking will be located in a structure on the 2nd-5th floors of the building. The façade of the garage was designed as a type 1 garage with quality materials that break up the horizontal nature of the garage and integrate with the uses below.
6.4.7.B.4	<i>Open Space.</i> Landscape strips required in parking areas shall not apply to UOS calculations. Developments are encouraged to make significant contributions to Open Space along the Mystic River adjacent to the ASMD.			x	This site has 1.7% (approximately 1,964 square feet) of usable open space. Larger areas of usable open space will be on other parcels were they are consolidated to make larger spaces that will connect the Assembly Row development to the waterfront. For example, a large open space on Block 2 located diagonally from the site. The overall calculation of useable open space in the PUD is 18 percent.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.7.B.5	<i>Efficiency of Design.</i> Every effort shall be made to design Buildings and use materials and construction techniques to optimize daylight in building interiors, natural ventilation, energy efficiency, and to minimize exposure to and consumption of toxics and non-renewable resources and incorporate appropriate "green" design techniques. In accordance with this principle all Developments within the ASMD in excess of ten thousand (10,000) square feet shall be required to complete an Leadership in Energy & Environmental Design (LEED) worksheet and submit the worksheet to the SPGA with permit application materials. This worksheet shall be considered in evaluating whether a proposed Development meets the applicable standards set forth elsewhere in this Ordinance. However, consistency with the LEED standards shall not be a factor in whether or not to permit a Development.			x	The Application included a LEED worksheet. A condition of approval is that the Applicant make best faith efforts to achieve LEED certification for the building and LEED-ND for the neighborhood.
6.4.7.B.6	<i>Contributions.</i> Contributions for Infrastructure and Open Space related to a Development made by an Applicant to the City or its constituent agencies in other agreements or permits shall be credited by the SPGA toward any applicable requirements hereunder for a Special Permit.	x		x	The Applicant has committed to contributions and mitigation under contracts with the City and the SPGA shall take that into consideration. The applicant will enter into maintenance agreements for useable open space and a portion of the public infrastructure as well.
6.4.7.B.7	<i>Loading Spaces.</i> To the extent possible, Loading spaces shall be located away from major Public Ways, the Mystic River and other highly visible locations. Every effort shall be made to incorporate creative design to reduce the negative visual impacts of the Loading space.			x	The loading areas are located within the building and are not visible from the major public ways.
<u>B.7: ASMD Large Project Development Standards (SZO Section 6.4.8.D)</u>					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.8.D.1	<p>Transportation Analysis. Large Developments shall provide a Transportation Access and Impact Study. The Director of Traffic and Parking shall approve the geographic scope and content of the study in consultation with the Executive Director of the Planning Department and the Traffic Commission. In addition, the Applicant shall submit a Transportation Demand Management (TDM) plan tailored to the specific uses and the geographic location of the Development Site. If the Transportation Access and Impact Study indicates a significant impact to the transportation network in the specified study area, the Applicant shall include in the study proposed mitigation measures to address those impacts.</p>	x		x	<p>A full Traffic Impact and Access Study was prepared for the project and was included in the original submission package. The applicant has provided data indicating that neither the underlying traffic conditions near Assembly Square nor the Project itself have changed to the degree that a new Traffic Impact and Access Study is required. The Traffic Engineer indicated that all facets of intersections and roadways illustrated on the revised Master Plan are consistent with proper Traffic Engineering design practice. The proposed use is consistent with the development scenario contemplated in the study. Therefore, additional transportation analysis data is not necessary. The Assembly Square roadway improvements will be readily available to accommodate traffic generated by Block 3 and future development. The MBTA put the new Orange Line Station project out to bid for construction and the station is expected to be operational by 2014. The station will reduce the burden on the roadways by providing an alternative to vehicular transportation.</p>
6.4.8.D.2	<p><i>Large Retail Projects.</i> Any Large Development in which any single Retail Use is more than fifty thousand (50,000) square feet of gross floor area shall also be deemed a Large Retail Project. A). Nonretail Component --“No Large Retail Project ... shall be permitted in the ASMD unless permitted as part of a PUD-A which includes 1.5 net square feet of non-retail uses for every square foot over 50,000 net square feet of Retail Use in the Large Retail Project.” B). Ground Level Retail Size Cap-- “In a Large Retail Project, not more than 50,000 square feet of Gross Floor area of any single Retail Use shall be located on the Ground Floor of any Building included in the PUD-A.”</p>			x	<p>Section A) The proposed PUD meets this requirement as indicated in the Overall Site Plan breakdown of the proposed uses. Section B) The Applicant received a waiver from this requirement with the 2006 approval of the PMP for the TJ Maxx Store and the Christmas Tree Shop. Otherwise, the proposed PUD meets this requirement and no additional waivers from this provision are requested at this time. A condition of approval is that one retail tenant cannot make up more than 50,000 sf of the ground floor of any building.</p>

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.8.D.3	<i>Landscaping.</i> A minimum of fifty (50) percent of the Landscaped Area in a new Large Development shall be Usable Open Space. The SPGA shall have final discretion in deciding if land constitutes Open Space for the purposes of determining whether this requirement has been met. The Open Space requirement may be met with land that is part of the Large Development, or with land that is outside of the Large Development area but is located within the ASMD that was not already Useable Open Space, provided that the conditions of paragraph 2 of Section 16.6.1 of the Ordinance relating to public dedication of such Usable Open Space are met.			x	As required, the proposed PMP includes greater than 15% usable open space. This project contributes a small amount to the usable open space for the development; however, as a whole the development will exceed the requirement and locate usable open space in strategic locations. There will be 18 % open space in the PUD and 1.7% usable open space on Block3.
<i>B.8: ASMD Large Project Design Guidelines (SZO Section 6.4.8.E)</i>					
Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.8.E.1	<i>Structured Parking.</i> Due to the size and scope of Large Developments, every effort shall be made to provide as much parking as possible underground and/or in structures	x		x	The 571 parking spaces will be provided in a structure.

Appendix C: Requirements for SPSR-A and SP for Signage

<i>C1: Requirements for SPSR-A</i>					
<i>Section</i>	<i>Required Finding</i>	<i>Met in PUD</i>	<i>Not Met</i>	<i>Met in SPSR-A</i>	<i>Comment</i>
6.4.9.C.1	Traffic impact and proposed mitigation, if any, (should be) consistent with any applicable Transportation Study, Traffic Access and Impact Study and/or Transportation Demand Management Plan, and the goals and objectives of the ASD Plan			x	There will be no additional traffic impacts created, above and beyond what was anticipated in the original traffic study.
6.4.9.C.2	The application (should) reflect an overall consistency with the intent and purpose of any applicable Design Guidelines set forth in this Section 6.4			x	The applicant has provided proposed Design Guidelines as part of the PUD-PMP. See Appendix B for assessment of the guidelines for consistency with the Design Guidelines set out in 6.4.7B and 6.4.8E of the SZO. Projects developed in accordance with the submitted Design Guidelines should be able to meet the general provisions of these sections and this project complies with the amended design guidelines for the master plan. The form of the building has changed since the design guidelines were created that were approved as part of the revised PUD-PMP. The 8-story hotel will not be built on this Block and the cinema floor plate has been rotated shifting the parking garage to floors two through five along the Assembly Square Drive side of the building. The design guideline for Block 3 has been altered to reflect this change and ensure that the proposal is comparable to a guideline that is consistent with the PUD-PMP. Details of how the building conforms to the guidelines can be found in the form and design section of the staff report.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
6.4.9.C.3	The application (should) promote the following objectives: mix of residential, office, research and development, retail, hotels, places of assembly and institutional uses' economic benefits and employment opportunities' structured parking; pedestrian and bicycle access; affordable housing units and project mitigation contribution; view corridors to the Mystic River; enhanced and activated Open Space' creation of new Open Space or enhancement of existing Open Space; and, . . . support transit service at (the MBTA Station).			x	The retail and cinema uses will provide a mix of uses and entertainment for the neighborhood that will be under construction and for the existing surrounding neighborhoods. Pedestrian and bicycle access will be provided via sidewalks surrounding the site. There will be structured parking for 517 spaces. An agreement has been established between the Applicant and the City such that it is likely that this development will not pay a project mitigation contribution. The building will provide an interesting corner that will be visible from the future open space on Block 2. The uses in the building will attract people from the surrounding area and will therefore support the transit service in Assembly Square.
6.4.9.C.4	Additional Findings and Determinations: Prior to granting a Special Permit with Site Plan Review-A, the SPGA shall make findings and determinations as noted in 6.4.9.C.4			x	These additional findings address submittal requirements, criteria for review, impact on public services, site surface drainage, access to buildings, utilities, signage, transformers, screening, and shadow impacts. These materials were submitted as part of the application for the Block.
5.2.5.a	<i>Information supplied.</i> Complies with the information requirements of Section 5.2.3			x	Applicants submitted all required information for SPSR-A applications.
5.2.5.b	<i>Compliance with standards.</i> Complies with such criteria or standards as may be set forth in this Ordinance which refer to the granting of the requested special permit with site plan review			x	Applicants meet individual SPSR-A findings as identified in this Appendix C.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
5.2.5.c	<i>Purpose of district.</i> Is consistent with the intent of the specific zoning district as specified in Article 6			x	The overall plan is consistent with the intent of the specific zoning district and this project is consistent with the PMP. The project advances the district's goals of development a mix of uses including retail and a cinema and does not preclude the other mix of uses planned for the area to locate near the site. The project will also creates new jobs in the City.
5.2.5.d	<i>Site and area compatibility.</i> Is designed in a manner that is compatible with the existing natural features of the site and is compatible with the characteristics of the surrounding area, and that the scale, massing and detailing of buildings are compatible with those prevalent in the surrounding area			x	The overall plan is compatible with natural features and character of the surrounding area. The project is consistent with the PMP and therefore meets this finding. The waterfront, existing mall, and proposed development sites were considered when designing the site.
5.2.5.e	<i>Functional design.</i> Meets accepted standards and criteria for the functional design of facilities, structures, and site construction			x	The building and site meets functional standards of the SZO.
5.2.5.f	<i>Impact on Public Systems.</i> Will not create adverse impacts on the public services and facilities serving the development, such as the sanitary sewer system, the storm drainage system, the public water supply, the recreational system, the street system for vehicular traffic, and the sidewalks and footpaths for pedestrian traffic			x	The applicant has adequately addressed that the overall project, with agreed-upon public service upgrades, will have adequate public services. The proposed project is consistent with the uses anticipated in the public services and facilities impact assessment that was created for the PMP and does not have any adverse impacts within the development site.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
5.2.5.g	<i>Environmental impacts.</i> Will not create adverse environmental impacts, including those that may occur off the site, or such potential adverse impacts will be mitigated in connection with the proposed development, so that the development will be compatible with the surrounding area			x	The applicant has adequately addressed that the overall project mitigates adverse environmental impacts, cleans an existing brownfield and redevelops a waterfront site with future transit access. Furthermore, upgrades to DCR parkland will provide off-site open space for the project as well as the surrounding neighborhood. No unanticipated environmental impacts have arisen since the PMP approval that would cause concern for the development of the Block.
5.2.5.h	<i>Consistency with purposes.</i> Is consistent with: 1) the purposes of this Ordinance, particularly those set forth in Article 1 and Article 5; and 2) the purposes, provisions, and specific objectives applicable to the requested special permit with site plan review which may be set forth elsewhere in this Ordinance, such as, but not limited to, those at the beginning of the various sections			x	The project meets the purpose of the Ordinance in encouraging the most appropriate use of the land and increasing the amenities of the municipality. The project also meets the purpose of Article 5 for the Board to evaluate the findings and determinations and provisions of the Ordinance and attach conditions to mitigate concerns.
<u>C2: Requirements for SP for Signage</u>					
5.1.4.a	<i>Information supplied.</i> Complies with the information requirements of Section 5.1.2			x	Applicants submitted all required information for SP for signage
5.1.4.b	<i>Compliance with standards.</i> Complies with such criteria or standards as may be set forth in this Ordinance which refer to the granting of the requested special permit			x	Section 6.4.14 allows for the SPGA to waive signage requirements based on the findings in 16.5.4 & 16.5.5. See Appendix E for findings.

Section	Required Finding	Met in PUD	Not Met	Met in SPSR-A	Comment
5.1.4.c	<i>Consistency with purposes.</i> Is consistent with: (1) the general purposes of this Ordinance as set forth in Article 1, and (2) the purposes, provisions, and specific objectives applicable to the requested special permit which may be set forth elsewhere in this Ordinance, such as, but not limited to, those purposes at the beginning of the various Articles			x	The signage plan is consistent with the purpose of the Ordinance in encouraging the most appropriate use of the land. This is a large building that meets the mixed use and redevelopment goals of the district. The large signs that are taller than 35' are strategically placed where they will be visible from Interstate-93 and not visible from the ground level near the building.
5.1.4.d	<i>Site and area compatibility.</i> Is designed in a manner that is compatible with the existing natural features of the site and is compatible with the characteristics of the built and unbuilt surrounding area, including land uses.			x	The signage was designed to be integral with the design of the building. The cinema signs will be on a metal canopy near the entrance, on a projection that wraps the corner of the building and on a portion of the building that will be recessed behind the parking garage on Assembly Square Drive. The parking signage is logically placed above entrances to the garage lobbies and vehicular access point.

Appendix D: Standards for Waivers

E.1 Loading Waiver				
Section	Required Finding	Met	Not Met	Comment
16.5.4 & 16.5.5	<i>Waiver of dimensional standards.</i> In order to maximize flexibility in the application of design standards to PUD projects, the SPGA may waive strict compliance with the standards of Section 16.5 upon making a determination that: (a) such a waiver would result in a better site plan than strict compliance with the stated standards; (b) the proposed PUD design furthers the Purpose and PUD Design Guidelines of this section; and (c) the granting of such a waiver will not cause detriment to the surrounding neighborhood.	x		The applicant is requesting one waiver from the loading standard in Section 9.7 as referenced in Section 9.16.3 . The waiver would allow for 2 loading areas on the site instead of the 10 that may be required depending on the mix of retail and restaurant uses. The waiver meets the required findings as follows: a) removing the loading area would result in a better site plan by being able to provide more retail space on the ground floor to enliven the Assembly Square neighborhood; b) the waiver furthers the design and purpose of the PUD by locating the loading in the middle of the block and away from major Public Ways, the Mystic River and other highly visible locations and achieves the goal of making every effort to incorporate creative design to reduce the negative visual impacts of loading spaces; and (c) the granting of such a waiver will not cause detriment to the surrounding neighborhood as loading will be coordinated to be staggered and some tenants will have van delivers that take up half the loading area required for a truck.
6.4.12.a.1	Strict enforcement of such standards or requirements would run counter to achieving the objectives of the ASD Plan;	x		The ASD Plan encourages below ground parking and discourages surface parking. Reducing the footprint of the ground floor of the building to build more loading space that is not practically needed for loading to this building would be counter to the objectives of the ASD Plan.
6.4.12.a.2	The application is substantially consistent with the objectives of the ASD Plan and advances the objectives of the ASD Plan;	x		The waivers create a development on Block 3 that is part of a mixed-use program that creates pedestrian oriented streets on all four sides that are only minimally disrupted by access to loading areas. The waiver to retain this nature of the building and not create a need to have large expanses of the facade devoted to loading is consistent with the objectives of the ASD Plan.

Section	Required Finding	Met	Not Met	Comment
6.4.12.a.3	In the case of any Alteration of a Nonconforming Structure, a Change of Nonconforming Use, or a Major Amendment to an Approved PUD, such alteration, change or amendment shall conform, to the extent feasible, to the objectives of the ASD Plan	n/a		This finding does not apply in this case.
E.2 Signage Waiver				
16.5.4 & 16.5.5	<i>Waiver of dimensional standards.</i> In order to maximize flexibility in the application of design standards to PUD projects, the SPGA may waive strict compliance with the standards of Section 16.5 upon making a determination that: (a) such a waiver would result in a better site plan than strict compliance with the stated standards; (b) the proposed PUD design furthers the Purpose and PUD Design Guidelines of this section; and (c) the granting of such a waiver will not cause detriment to the surrounding neighborhood.	x		The applicant is requesting a waiver for the 35' height limit for signage and the amount of signage allowed at the site. The waiver meets the required findings as follows: a) the signage will be on the building and will not impact the site plan; b) the waiver furthers the design and purpose of the PUD by allowing for advertisement for the large amount of retail tenants in the building and for Assembly Row in strategic locations that is visible from Interstate-93 but not visible from the ground near the site; and (c) the granting of such a waiver will not cause detriment to the surrounding neighborhood as the sign design is sensitive to the building and surrounding area..
6.4.12.a.1	Strict enforcement of such standards or requirements would run counter to achieving the objectives of the ASD Plan;	x		The ASD Plan encourages a variety of block and building scales oriented to pedestrians, with a mid rise building environment and high quality open spaces. Limiting strategically place and well designed signage on large scale, mixed use building would impede upon the success of the uses within the building and would be counter to the objectives of the ASD Plan.
6.4.12.a.2	The application is substantially consistent with the objectives of the ASD Plan and advances the objectives of the ASD Plan;	x		The signage create another dimension to the building, which improves the facade and scale of the building and provides direction to pedestrians and vehicles. The result is consistent with the objectives of the ASD Plan in creating a functional mixed-use building.

Section	Required Finding	Met	Not Met	Comment
6.4.12.a.3	In the case of any Alteration of a Nonconforming Structure, a Change of Nonconforming Use, or a Major Amendment to an Approved PUD, such alteration, change or amendment shall conform, to the extent feasible, to the objectives of the ASD Plan	n/a		This finding does not apply in this case.

Appendix E: Block 3 Conditions

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
<i>This list of conditions includes the conditions that were part of the PUD PMP that relate to this SPSR phase.</i>						
A. General						
1	Approval is based upon the application stamped in at the City Clerk's office on Sept 22, 2011, including EL 0 First Floor Plan, EL 18 Second Floor Plan, EL 40 Third Floor Plan, all dated Oct 4, 2011; North, West, South, East Elevations dated Oct 4, 2011; Perspective Views Main St & C Street and Assembly Square Drive & C Street dated Oct 4, 2011; Signage Package Elevations North, West, South, East dated Oct 4, 2011; C-2, C-3 Neighborhood Context Map 1 and 2, C-4 Overall Site Plan 1, C-5 Overall Site Plan 2, C-6 Layout and Materials Plan, C-7 Grading, Drainage Plan, C-8 Utility Plan, C-9 Turning Template Plan all dated Sept 30, 2011, Open space Summary for the PUD dated Sept 20, 2011.		Planning Director	Continuous		
2	Approval is subject to the Applicant's and/or successor's right, title and interest in the property.		Planning Director	Continuous		Required legal documentation to be submitted. Deed submitted & application form signed.
3	The Applicant must contact the Engineering Department to obtain a street address prior to a certificate of occupancy being issued. The Applicants will make best faith efforts to secure an address for the building as quickly as possible.		Engineering	CO		

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
B. Urban Design and Design Guidelines						
4	The following elements of the building design may be altered per Planning Staff approval after review and comment from the Design Review Committee: increase the height of vertical elements in the streetscape façade past the second story of the building, change in material or material pattern of the metal panels, inclusion of a rooftop terrace on the second story roof with or without a canopy/trellis structure for the cinema along Main Street, adjustment of the placement of the prominent bay along Main Street to match the location of the primary retail entrance along the street, and change in the location of the bicycle parking to convenient locations.		Planning Director	Vertical Construction		
5	All storefronts and retail signage shall be consistent with the design standards to be developed. Storefronts or retail signage that is inconsistent with the guidelines shall be provided to DRC and Planning Board for review and approval.		Planning Director	Building Permit for retail unit and retail signage		
6	The Applicant shall submit information regarding the material and lighting for the proposed garage and upper story retail signage for Planning Staff for review and approval.		Planning Director	Building Permit for Signage		
7	Advertising for Assembly Row and specific tenants in the building are permitted through this approval. Off premises advertising is not approved through this special permit and is subject to all applicable state and local permit requirements.		Planning Director	Continuous		
8	Applicant shall provide information regarding the final material and colors for siding, trim, windows and doors for DRC review and Planning Staff review and approval prior to construction. On-site mockups shall be provided if deemed necessary by planning staff because the samples do not make it possible to determine how the elements of the building will be constructed and will operate on the building.		Planning Director	Vertical Construction		
9	The garage door and transformer room overhead doors shall contain graphics subject to Planning Staff review and approval that conforms to the design guideline for loading areas.	-	Planning Director	CO		

Block 3

PB 2011-16

October 17, 2011

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
10	Not more than 50,000 square feet of Gross Floor area of any single Retail Use shall be located on the Ground Floor of the building.		Planning Director	CO for retail		
C. Transportation / Traffic Circulation						
11	Applicant shall supply at least 18 bicycle parking spaces and signage to inform the public of where the bicycle parking is located.		Planning Director	CO		
D. Trash and Recycling						
12	Trash and recycling storage shall be contained in the designated trash room which is internal to the block. The Applicant shall provide recycling.		Planning Director / DPW	Continuous		
E. Maintenance of Facilities						
13	The Applicant, its successors and/or assigns, shall be responsible for maintenance of both the building and all on-site amenities, including landscaping, publicly assessable open space, fencing, lighting, parking areas and storm water systems, ensuring they are clean, well kept and in good and safe working order.		Planning Director	Continuous		
14	To the extent possible, all exterior lighting must be confined to the subject property, cast light that does not intrude, interfere or spill onto neighboring properties.		Planning Director	Continuous		
F. Demolition/Construction						
15	The Applicant shall at his expense replace any existing equipment (including, but not limited to street sign poles, signs, traffic signal poles, traffic signal equipment, wheel chair ramps, granite curbing, etc) and the entire sidewalk immediately abutting the subject property if damaged as a result of construction activity. All new sidewalks and driveways must be constructed to DPW standard.		Planning Director	Certificate of Occupancy		
16	All construction materials and equipment must be stored onsite or in a secure staging area to be identified in the building permit application. If occupancy of the street layout is required, such occupancy must be in conformance with the requirements of the Manual on Uniform Traffic Control Devices and the prior approval of the Traffic and Parking Department must be obtained.		Traffic & Parking	During Construction		
17	The Applicant shall provide notice of intent to strictly comply with applicable State and Federal regulations regarding air quality including without limitation continuous dust control during demolition and construction.		Plng/OSE	CO		

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
G. Fire Prevention						
18	A complete fire sprinkler and standpipe systems, an approved fire alarm system, a radio master box, and 24 hour monitoring by an approved central station company shall be installed. The systems must be 100% complete before any occupancy is allowed. There may be additional requirements attached to the permits pending review of more specific information that will need to be submitted before Fire Prevention's approval.		Fire Prevention	Certificate of Occupancy		
H. Final Planning Signoff						
19	The Applicant shall contact Planning Staff at least five working days in advance of a request for a final inspection by Inspectional Services to ensure the proposal was constructed in accordance with the plans and information submitted and the conditions attached to this approval.		Planning Director	Sign-off		

Appendix F: Square Footage/Linkage/Usable Open Space/Parking Space Tracker

Appendix G: Applicable PUD-PMP Conditions

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
<i>This list of conditions includes the conditions that were part of the PUD PMP that relate to this SPSR phase.</i>						
A. General						
1	Applicant will work with the City to develop the long term maintenance agreement noted in Section 12.1B of the application form that will provide for the Proponent's commitments to the City relative to maintenance of the elements of the public right of ways including sidewalk treatments, street trees, landscaping , finishes, street furniture and other amenities. The City will not maintain anything that is not consistent with City standard, unless otherwise approved by the City Engineer.	-	Planning Director / City Engineer	Prior to Building Permit for any of blocks 1, 2, 3, 4, 5, 6, 7, 8 or 9		
2	Applicant will work with the City to develop the long term maintenance agreement for the Useable Open Space as required in Article 17 of the SZO. The agreement shall specify the requirements for public access and private maintenance of useable open space in the plan, as required by the SZO. The applicant shall build out and maintain all of the open space and allow public access to all of the useable open space in the plan as required by the SZO. The applicant will submit 100% construction plans for open space to the City for review and comment.	-	Planning Director / City Engineer / DPW	Prior to Building Permit for any of blocks 1, 2, 3, 4, 5, 6, 7, 8 or 9		
3	The applicant will submit a plan amendment to subdivide all public roadway right of way from development blocks, to be approved by the Planning Board per the SZO, and filed with the Middlesex South Registry of Deeds. Any minor plan changes to this initial subdivision will be reviewed for approval by the Planning Director and Director of Traffic and Parking as a minor plan change.	-	Planning Director	Prior to Building Permit for any of blocks 1, 2, 3, 4, 5, 6, 7, 8 or 9		

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
B. Transportation / Traffic Circulation						
4	Applicant shall work with the MBTA and the City of Somerville to identify a bus route through the site and to provide appropriate bus stops that provide safe and convenient access to the MBTA Station, Main Street, IKEA, and the Marketplace. Any change to the roadway plans to provide bus stops, including the removal of on-street parking spaces, shall require the approval of the City Engineer and Planning Director.	-	Planning Director / City Engineer	Prior to opening of any new public street in the project (other than Assembly Square Dr)		
5	Applicant shall be required to submit proposed names for all streets for the review pursuant to Section 12.1 and 2-309.5 of the Code of Ordinances. The applicant should note that street names that are the same or similar to names already used in Somerville shall not be permitted.	-	Planning Director	Prior to opening of any new street		
6	The applicant shall include conduits for parking kiosks in street construction plans as required by the Director of Traffic and Parking with review and approval by the City Engineer.	-	T&P Director / City Engineer	Prior to approval of plans by Director of Traffic and Parking with review and approval by the City Engineer		
C. Water Systems						
7	Applicant shall ensure that all materials shall be in accordance with the City of Somerville Water and Sewer Division's Specifications and/or Rules and Regulations, latest issue.	-	City Engineer	Prior to trench permit for roadway construction		This is complete within Assembly Square Drive, but review will be required for streets in the mixed-use area. Block 3 PB 2011-16 October 17, 2011

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
8	Roadway construction plans shall provide for hydrants, as required to ensure adequate fire protection for the site in compliance with applicable local, state, and federal requirements as determined by the Fire Chief and City Engineer.	-	Fire Chief / City Engineer	Prior to trench permit for roadway construction		
9	Applicant shall install valves at each intersection, and correspondingly show and label on all drawings. All tees, bends, reducers, and other fittings should also be labeled on the drawings.	-	City Engineer	Prior to trench permit for roadway construction		
10	Applicant shall provide individual calculations to determine the sizes necessary for the connections to each property. The proposed service connections to each of the new buildings shall be shown on further design drawings.	-	City Engineer	Prior to trench permit for roadway construction		
D. Sanitary Sewer Systems						
11	Design and construction phasing of the sanitary sewer system shall be subject to review and approval by the City Engineer to ensure compliance with City standards and best practices for design and ongoing maintenance.	-	City Engineer	Prior to trench permit for roadway construction		
12	The profiles of the proposed sewer system has been submitted to the City Engineer. The building permit will not be issued until the Engineer reviews and approves the system. Applicant must ensure that there are no conflicts with other proposed utilities.	-	City Engineer	Building Permit		
13	Details of proposed pipe materials have been sent to the City Engineer for his review and approval prior to the issuance of a building permit.	-	City Engineer	Building Permit		

Block 3

PB 2011-16
October 17, 2011

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
14	Applicant shall make every effort to comply with DEP requirement that states "whenever possible" a minimum horizontal distance of ten feet shall be maintained between sewer lines and water mains. Exceptions are usually only allowed when there are conflicts with existing utilities or existing structures that would prevent obtaining the proper separation.	-	City Engineer	Prior to trench permit for roadway construction		
E. Stormwater Management System						
15	Design and construction phasing of the stormwater management system shall be subject to review and approval by the City Engineer to ensure compliance with City standards and best practices for design and ongoing maintenance.	-	City Engineer	Prior to trench permit for roadway construction		
16	Applicant shall provide the Planning Board with a status report on the receipt of necessary permits from MWRA.	-	Planning Director	Continuous		
17	Applicant shall furnish health and safety requirements for utility workers for all roadways to be constructed on private property and subsequently dedicated as public ways.	-	Planning Director	Prior to dedication of public ways		
18	The Applicants supplied minimum measures for soil erosion control that will be used on the project site. The contractor and owner shall prepare and implement a Stormwater Pollution Prevention Plan in compliance with EPA NPDES regulations.	-	City Engineer / Con. Comm. where applicable	Prior to trench permit for roadway construction and CO		
F. Urban Design and Design Guidelines						
19	The Applicant shall provide funds for design and up to \$1 million in funds for construction of the pedestrian crossing from Assembly Square to the Ten Hills neighborhood.	-	Planning Director	Prior to CO for first SPSR-A in mixed-use area		25% design is complete

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
20	As part of each site plan review submittal, the Applicant shall calculations showing that the percentage of open space and usable open space meets the zoning requirement for a PUD-A within the ASMD.	X	Planning Director	Addressed with each SPSR-A application		Complete
21	Applicant shall ensure that the sunlight conditions shown on the plans are adequate for the tree species proposed within the public right of ways if trees are to be maintained by the City.	-	City Engineer	Prior to installation of street trees		
22	Applicant shall make reasonable efforts to employ smart growth techniques in overall development, including but not limited to: Low Impact Development for Stormwater Management, bioswales and sustainable green technologies, and LEED certification;	-	City Engineer	Prior to trench permit for roadway construction or Building Permit, whichever is applicable		

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
23	<p>Applicant shall be responsible for all design, construction, maintenance and repair of all roadways, streetscape including street lighting and other street furniture furnishings, and parks and open space which are part of the PUD. Applicant shall be responsible for the design and construction of water, sewer, and storm drainage systems serving the PUD. Applicant shall be responsible for the usage costs of electricity, gas, water, cable and other utilities furnished to the PUD, and for trash removal. The City shall be responsible for the maintenance and repair of water, sewer, and storm water conduits, and traffic signals on public ways.</p> <p>The City shall also be responsible for snowplowing and street cleaning, including the cleaning of catch basins, except that the City shall not be responsible for LID tree boxes. The Applicant shall be responsible for designing, constructing, maintaining, and repairing similar "Smart Technology" required by MEPA. All utilities shall be designed and installed in accordance with the City of Somerville's standards and specifications. Notwithstanding the foregoing, if the maintenance agreement includes provisions for</p>	-	Planning Director / City Engineer	Prior to Building Permit for any of blocks 1, 2, 3, 4, 5, 6, 7, 8 or 9		
24	Applicant shall provide details of the pedestrian connection from Assembly Square to Draw 7 Park under the railroad bridge.	-	Planning Director	Prior to trench permit for roadway construction in A Street		

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
25	Applicant shall show the future potential pedestrian connection from the proposed Assembly Square T Station to Draw 7 Park. The design of the project and T Station shall not preclude the ability for the future design and construction of a direct pedestrian connection from the Station into the park. (The Applicant is not expected to construct the pedestrian connection, but merely to show it in the plans in the event that enough federal and state monies are available to construct such a connection as part of the T station.)	-	Planning Director	Prior to trench permit for roadway construction		
26	Applicant shall plan for a drop-off location and taxi stand for the MBTA station as a part of roadway design.	-	Planning Director / City Engineer / T&P Director	Prior to opening of any new public street in the project (other than Assembly Square Dr)		
27	Applicant shall depict the locations and design of handicapped accessible curb ramps for review and approval by the City Engineer.	-	City Engineer	Prior to installation of sidewalk		
28	The applicant shall provide a design guideline for all retail storefronts and signage within the PUD area for review by the DRC and approval by the Planning Board.	-	Planning Director	Prior to Building Permit for any of blocks 1, 2, 3, 4, 5, 6, 7, 8 or 9		
29	The applicant shall submit information regarding reasonable efforts that were used to secure LEED-ND approval for the project.	-	Planning Director	Prior to CO for first development in Mixed-Use area		Block 3 PB 2011-16

#	Condition	Complete	To Be Evaluated By:	Timeframe for Compliance	Verified (initial)	Notes
G. Maintenance of Facilities						
30	All City of Somerville traffic control equipment and roadway elements must meet City specifications and standards unless they are otherwise approved by the City Engineer and are maintained by the Applicant under the maintenance agreement.	-	City Engineer	Continuous		
31	Applicant shall provide street lights that meet City standards on all public streets where lights are to be maintained by the City.	-	City Engineer / DPW	Continuous		
H. Linkage and Inclusionary Zoning						
32	The applicant shall meet the obligations required by Article 13 and Article 15 of the SZO, as modified by a certain Amended and Restated Assembly Square Development Covenant dated December 14, 2006 by and between Federal Realty Investment Trust, IKEA Property, Inc., the City of Somerville, and the Somerville Redevelopment Authority, as amended by First, Second and Third Amendments, and as further amended from time to time.	-	Planning Director / Housing Director	CO
