

Regulation of the Revere Board of Health Restricting the Sale of Tobacco Products

A. Statement of Purpose:

Whereas there exists conclusive evidence that tobacco smoking causes cancer, respiratory and cardiac diseases, negative birth outcomes, irritations to the eyes, nose and throat¹;

Whereas the U.S. Department of Health and Human Services has concluded that nicotine is as addictive as cocaine or heroin² and the Surgeon General found that nicotine exposure during adolescence, a critical window for brain development, may have lasting adverse consequences for brain development,³ and that it is addiction to nicotine that keeps youth smoking past adolescence.⁴

Whereas a Federal District Court found that Phillip Morris, RJ Reynolds and other leading cigarette manufacturers “spent billions of dollars every year on their marketing activities in order to encourage young people to try and then continue purchasing their cigarette products in order to provide the replacement smokers they need to survive” and that these companies were likely to continue targeting underage smokers⁵;

Whereas more than 80 percent of all adult smokers begin smoking before the age of 18, more than 90 percent do so before leaving their teens, and more than 3.5 million middle and high school students smoke;⁶

Whereas 18.1 percent of current smokers aged <18 years reported that they *usually* directly purchased their cigarettes from stores (i.e. convenience store, supermarket, or discount store) or gas stations, and among 11th grade males this rate was nearly 30 percent ;⁷

Whereas the Institute of Medicine (IOM) concludes that raising the minimum age of legal access to tobacco products to 21 will likely reduce tobacco initiation, particularly among adolescents 15 – 17, which would improve health across the lifespan and save lives⁸.

Whereas cigars and cigarillos, can be sold in a single “dose;” enjoy a relatively low tax as compared to cigarettes; are available in fruit, candy and alcohol flavors; and are popular among youth⁹;

Whereas research shows that increased cigar prices significantly decreased the probability of male adolescent cigar use and a 10% increase in cigar prices would reduce use by 3.4%¹⁰;

Whereas the Surgeon General found that exposure to tobacco marketing in stores and price discounting increase youth smoking;¹¹

Whereas the U.S. Surgeon General recognized in his 2014 report that a complementary strategy to assist in eradicating tobacco related death and disease is for local governments to ban categories of products from retail sale;¹²

Whereas the U.S. Centers for Disease Control and Prevention has reported that the current use of electronic cigarettes, a product sold in dozens of flavors that appeal to youth, among middle and high school students tripled from 2013 to 2014;¹³

Whereas 5.8% of Massachusetts youth currently use e-cigarettes and 15.9% have tried them;¹⁴

Whereas the Massachusetts Department of Environmental Protection has classified liquid nicotine in any amount as an “acutely hazardous waste”;¹⁵

Whereas in a lab analysis conducted by the FDA, electronic cigarette cartridges that were labeled as containing no nicotine actually had low levels of nicotine present in all cartridges tested, except for one¹⁶;

Whereas according to the CDC’s youth risk behavior surveillance system, the percentage of high school students in Massachusetts who reported the use of cigars within the past 30 days is 10.8% in 2013;¹⁷

Whereas data from the National Youth Tobacco Survey indicate that more than two-fifths of U.S. middle and high school smokers report using flavored little cigars or flavored cigarettes;¹⁸

Whereas the sale of tobacco products is incompatible with the mission of health care institutions because these products are detrimental to the public health and their presence in health care institutions undermine efforts to educate patients on the safe and effective use of medication, including cessation medication;

Whereas educational institutions sell tobacco products to a younger population, who is particularly at risk for becoming smokers and such sale of tobacco products is incompatible with the mission of educational institutions that educate a younger population about social, environmental and health risks and harms;
