In order for any waiver of the City to be effective, it shall be in writing. The failure of the City to take any action in the event of any breach by the Licensee shall not be deemed or construed to constitute a waiver of or otherwise affect the right of the Issuing Authority or the City to take any action permitted by this renewal License at any other time in the event that such breach has not been cured, or with respect to any other breach by the Licensee.

(c) The Licensee shall make installation and service calls to its Subscribers from 8:00 AM to 7:00 PM Monday through Friday and from 9:00 AM to 5:00 PM on Saturday. In the event Licensee changes said service call hours, Licensee shall provide the Issuing Authority reasonable notice of such changes.

(d) Subscriber complaint or request for service received after regular business hours, as defined in Section 12.1 above, shall be acted upon the next business day. Verification of the problem and resolution shall occur as promptly as possible.

(e) The Licensee shall ensure that there are stand-by technicians on-call at all times after normal business hours. The answering service shall be required to notify the stand-by technician(s) of: (i) any emergency situations; (ii) an unusual number of calls; and/or, (iii) a number of similar complaint calls or a number of calls coming from the same area.

(f) System outages shall be responded to promptly, twenty-four (24) hours a day by technical personnel. For purposes of the section, an outage shall be considered to occur when three (3) or more calls are received from any one neighborhood, concerning such an outage, or when the Licensee has reason to know of such an outage. The Licensee shall supply the Issuing Authority, for his exclusive use, with a telephone number of appropriate management personnel in the event that emergency repair service is necessary.

(g) The Licensee shall remove all Subscriber Drop Cables, within seven (7) days of receiving a request from a Subscriber to do so.

Section 12.4  CUSTOMER SERVICE STANDARDS

Section 12.5  BUSINESS PRACTICE STANDARDS

(a) The Licensee shall provide the Issuing Authority, the Commission and all of its Subscribers with the following information in accordance with 207 CMR 10.00 et seq., attached hereto as Exhibit 10 and made a part hereof, as the same may exist or as may be amended from time to time:

(i) Notification of its Billing Practices;

(ii) Notification of Services, Rates and Charges;

(iii) Equipment Notification;

(iv) Form of Bill
(v) Advance Billing, Issuance of Bills;

(vi) Billing Due Dates, Delinquency, Late Charges and Termination of Service;

(vii) Charges for Disconnection or Downgrading of Service;

(viii) Billing Disputes; and

(ix) Service Interruptions.

(b) Notwithstanding the provisions of the Section 12.7(a)(i)-(ix), the Licensee shall not disconnect Subscribers on Saturday nights or at any time on Sunday.

Section 12.6 CUSTOMER IDENTIFICATION

In the event that the Licensee should require Social Security numbers to identify its Subscribers, such practice shall be allowed in the future only as long as it complies with all applicable State and/or federal laws relating to the use of Social Security numbers as a required form of identification. Notwithstanding the foregoing, the Licensee shall inform the Issuing Authority or his Designee(s) of any other forms of identification that will be accepted in the regard.

Section 12.7 COMPLAINT RESOLUTION PROCEDURES

(a) The Licensee shall establish a procedure for resolution of complaints by Subscribers.

(b) Upon reasonable notice, the Licensee shall expeditiously investigate and resolve all complaints regarding the quality of Service, equipment malfunctions and similar matters. In the event that a Subscriber is aggrieved, the Issuing Authority shall be responsible for receiving and acting upon such Subscriber complaints and/or inquiries, as follows:

(i) Upon the written request of the Issuing Authority, the Licensee shall, within ten (10) business days after receiving such request, send a written report to the Issuing Authority with respect to any complaint. Such report shall provide a full explanation of the investigation, finding and corrective steps taken by the Licensee.

(ii) Should a Subscriber have an unresolved complaint regarding cable television operations, the Subscriber shall be entitled to file his or her complaint with the Issuing Authority or his Designee(s), who shall have primary responsibility for the continuing administration of this Renewal License and the implementation of complaint procedures. The Subscriber shall thereafter meet jointly with the Issuing Authority or his Designee(s) and a representative of the Licensee, within thirty (30) days of the Subscriber’s filing of his or her complaint, in order to fully discuss and resolve such matter. The Licensee shall notify each new Subscriber, at the time of initial installation of Cable Service, of the procedures for reporting and resolving all of such complaints, and annually to all Subscribers.
(c) Notwithstanding the foregoing, if the Issuing Authority or his Designee(s) determines it to be in the public interest, the Issuing Authority or his Designee(s) may investigate any multiple complaints or disputes brought by Subscribers arising from the operations of the Licensee.

(d) In the event that the Issuing Authority or his Designee(s) finds a pattern of multiple unresolved Subscriber complaints, the Issuing Authority or his Designee(s) shall suggest appropriate amendments to the Licensee’s procedures for the resolution of complaints. The Licensee shall consider the reasonableness of the suggested amendment(s), provided that such amendment(s) does not unreasonably increase the cost of providing Cable Service.

Section 12.8 REMOTE CONTROL DEVICES

The Licensee shall allow its Subscribers to purchase, from legal and authorized parties other than the Licensee, own, utilize and program remote control devices which are compatible with the Converter(s) provided by the Licensee. The Licensee takes no responsibility for changes in its equipment which might make inoperable the remote control devices acquired by Subscribers.

Section 12.9 LOSS OF SERVICE-SIGNAL QUALITY

The Licensee shall comply with all applicable FCC statutes, regulations and standards relating to quality of the Signals transmitted over the Cable System. Upon a showing of a number of complaints from Subscribers that indicates a general or area-wide Signal quality problem concerning consistently poor or substandard Signal quality in the System, the Issuing Authority shall, after giving the Licensee fourteen (14) days’ written notice and an opportunity to cure said deficiency, order the Licensee to correct said Signal quality deficiencies, within fourteen (14) days of said order; provided, however, that the Licensee may request additional time from the Issuing Authority in which to correct said deficiency, which permission shall not be unreasonably denied. The Issuing Authority and the Licensee shall enter into good faith discussions concerning possible remedies for consistent Signal degradation.

Section 12.10 EMPLOYEE IDENTIFICATION CARDS

All of the Licensee’s employees entering upon private property, in connection with the construction, installation, maintenance and/or operation of the Cable System, including repair and sales personnel, shall be required to carry an employee identification card issued by the Licensee and bearing a picture of said employee. If such employee(s) is not carrying such a photo identification card, and as result, is not admitted into a Subscriber’s home, such visit shall be deemed a missed service visit; however, if in the same instance the employee(s) is allowed to enter upon private property by the homeowner, work outside of the home where entrance into the home is not necessary, then it will not be deemed a missed visit.
Section 12.11 PROTECTION OF SUBSCRIBER PRIVACY

(a) The Licensee shall respect the rights of privacy of every Subscriber and/or User of the Cable Television System and shall not violate such rights through the use of any device or Signal associated with the Cable Television System, and as hereafter provided.

Section 12.13 MONITORING

Neither the Licensee nor its agents nor the City nor its agents shall tap, monitor, arrange for the tapping or monitoring, or permit any other Person to tap or monitor, any cable, line, Signal, input device, or subscriber Outlet or receiver for any purpose, without the prior written authorization of the affected Subscriber or User; provided, however, that the Licensee may conduct system wide or individually addressed “sweeps” solely for the purpose of verifying System integrity, checking for illegal taps, controlling return-path transmission, billing for pay Services or monitoring channel usage in a manner not inconsistent with the Cable Act. The Licensee shall report to the affected parties and the Issuing Authority any instances of monitoring or tapping of the Cable Television System, or any part thereof, of which it has knowledge, whether or not such activity has been authorized by the Licensee.

The Licensee shall not record or retain any information transmitted between a Subscriber or User and any third party, except as required for lawful business purposes. The Licensee shall destroy all subscriber information of a personal nature after a reasonable period of time except as authorized not to do so by the affected Subscriber.

Section 12.14 DISTRIBUTION OF SUBSCRIBER INFORMATION

The Licensee and its agents and/or employees shall not, without the prior written authorization of the affected Subscriber or User, provide to any third party, including the City, data identifying or designating any Subscriber either by name or address. Said authorization may be withdrawn at any time by the Subscriber or User by providing written notice to the Licensee.
The Licensee shall provide annual notice to each Subscriber or User who has given the aforesaid authorization of each Subscriber’s or User’s right to withdraw the authorization. In no event shall such authorization be obtained as a condition of Service or continuation thereof, except as necessary to adequately provide particular Services.

Section 12.15 **POLLING BY CABLE**

No poll or other Upstream response of a Subscriber or User shall be conducted or obtained, unless (i) the program of which the Upstream response is a part shall contain an explicit disclosure of the nature, purpose and prospective use of the results of the poll or Upstream response, and (ii) the program has an informational, entertainment or educational function which is self-evident. The Licensee or its agents shall release the results of Upstream responses only in the aggregate and without individual references.

Section 12.16 **INFORMATION WITH RESPECT TO VIEWING HABITS AND SUBSCRIPTION DECISIONS**

Except as permitted by Section 631 of the Cable Act, neither the Licensee nor its agents nor its employees shall make available to any third party, including the City, information concerning the viewing habits or subscription package decisions of any individual Subscriber. If a court authorizes or orders such disclosure, the Licensee shall notify the Subscriber not less than fourteen (14) calendar days prior to disclosure, unless such notification is otherwise prohibited by applicable law or the court.

Section 12.17 **SUBSCRIBER’S RIGHT TO INSPECT AND VERIFY INFORMATION**

(a) The Licensee shall make available for inspection by a Subscriber at a reasonable time and place all personal subscriber information that the Licensee maintains regarding said Subscriber.

(b) A Subscriber may obtain from the Licensee a copy of any or all of the personal subscriber information regarding him or her maintained by the Licensee. The Licensee may require a reasonable fee for making said copy.

(c) A Subscriber or User may challenge the accuracy, completeness, retention, use or dissemination of any item of personal subscriber information. Such challenges and related inquiries about the handling of subscriber information shall be directed to the Licensee. The Licensee shall change any such information upon a reasonable showing by any Subscriber that such information is inaccurate.

Section 12.18 **PRIVACY STANDARDS REVIEW**

The Issuing Authority and the Licensee shall periodically review this Article 12 to determine that it effectively addresses appropriate concerns about privacy. This Article may be amended periodically by agreement of the Issuing Authority and the Licensee.

Procedures for Securing Permission to Install New Aerial Crossings or Underground Duct

Pursuant to the terms and conditions set forth in this License, before the Licensee extends its cables across any major street where no aerial cables cross those streets by City Ordinance, as of the effective date of this License, the Licensee must first obtain approval in accordance with Exhibit #1. Before aerial cables or underground ducts can be installed, the company proposing said work must submit a petition, with plans and specifications, to the Somerville City Clerk.

The City Clerk submits a copy of the petition to the Electrical Superintendent of Lights and Lines, who shows the petition to the City Engineer, and the Highway Commissioner. If the work involves undergrounding, the Water Commissioner is shown the petition as well. If approval is given by these officials, the petition is sent to the Commissioner of the Department of Public Works. The Commissioner sends a letter of approval to the City Clerk.

The City Clerk schedules a Public Hearing and invites abutters to attend the Hearing. At the Public Hearing before the Board of Aldermen, a company representative describes the scope and necessity of the work, and abutters and other individuals affected by the proposed work are given an opportunity to present their opinions.

If approval is given by the Board of Aldermen, the City Clerk sends the item to the Mayor. If the Mayor signs the item, the City Clerk sends a copy of the order and the bill for certification to the petitioner, to begin work. However, if the work involves undergrounding, the petitioner must bring approval to the Highway Commissioner, who must issue a Permit to Dig to the Petitioner before work can begin.

Part 76 of Chapter I of Title 47 of the Code of Federal Regulations is amended to read as follows:

§76.1700 Records to be maintained locally by cable system operators for public inspection.

The operator of every cable television system having 5000 or more subscribers shall maintain for public inspection a file containing a copy of all records which are required to be kept by §76.1701 (political file); §76.1715 (sponsorship identification); §76.1702 (EEO records available for public inspection); §76.1703 (commercial records for children's programming); §76.1704 (proof-of-performance test data); and §76.1706 (signal leakage logs and repair records).

(1)-(2) [Reserved]

(b) Location of records. The public inspection file shall be maintained at the office which the system operator maintains for the ordinary collection of subscriber charges, resolution of subscriber complaints, and other business or at any accessible place in the community served by the system unit(s) (such as a public registry for documents or an attorney's office). The public inspection file shall be available for public inspection at any time during regular business hours.

(c) All or part of the public inspection file may be maintained in a computer database, as long as a computer terminal is made available, at the location of the file, to members of the public who wish to review the file.

(d) The records specified in paragraph (a) of this section shall be retained for the period specified in §§76.1701, 76.1702, 76.1704(a), and 76.1706, respectively.

(e) Reproduction of records. Copies of any material in the public inspection file shall be available for machine reproduction upon request made in person, provided the requesting party shall pay the reasonable cost of reproduction. Requests for machine copies shall be fulfilled at a location specified by the system operator, within a reasonable period of time, which in no event shall be longer than seven days. The system operator is not required to honor requests made by mail but may do so if it chooses.

§76.601 Performance tests.
(a) The operator of each cable television system shall be responsible for insuring that each such system is designed, installed, and operated in a manner that fully complies with the provisions of this subpart.

(b) The operator of each cable television system shall conduct complete performance tests of that system at least twice each calendar year (at intervals not to exceed seven months), unless otherwise noted below. The performance tests shall be directed at determining the extent to which the system complies with all the technical standards set forth in § 76.605(a) and shall be as follows:

(1) For cable television systems with 1,000 or more subscribers but with 12,500 subscribers or less, proof-of-performance tests conducted pursuant to this section shall include measurements taken at six (6) widely separated points within each mechanically continuous set of cables within the cable television system. Within the cable system, one additional test point shall be added for every additional 12,500 subscribers or fraction thereof (e.g., 7 test points if 12,501 to 25,000 subscribers; 8 test points if 25,001 to 37,500 subscribers, etc.). Such proof-of-performance test points shall be balanced to represent all geographic areas served by the cable system. Within each mechanically continuous set of cables, at least one-third of the test points shall be representative of subscriber terminals most distant from the system input in terms of cable length. The measurements may be taken at convenient monitoring points in the cable network: Provided, that data shall be included to relate the measured performance of the system as would be viewed from a nearby subscriber terminal. An identification of the instruments, including the makes, model numbers, and the most recent date of calibration, a description of the procedures utilized, and a statement of qualifications of the person performing the tests shall be set forth.

(2) Proof-of-performance tests, to determine the extent to which a cable television system complies with the standards set forth in § 76.605(a)(3), (4), and (5) shall be made on each of the NTSC or similar video channels of that system. Proof-of-performance tests for all other standards in § 76.605(a) shall be made on a minimum of four (4) channels plus one additional channel for every 100 MHz, or fraction thereof, of cable distribution system upper frequency limit (e.g., 5 channels for cable television systems with a cable distribution system upper frequency limit of 101 to 216 MHz; 6 channels for cable television systems with a cable distribution system upper frequency limit of 217-300 MHz; 7 channels for cable television systems with a cable distribution system upper frequency limit of 300 to 400 MHz, etc.). The channel selected for testing must be representative of all the channels within the cable television system.

(3) The operator of each cable television system shall conduct semi-annual proof-of-performance tests of that system, to determine the extent to which system complies with the technical standards set forth in § 76.605(a)(4) as follows. The visual signal level on each channel shall be measured and recorded, along with the date and time of the measurement, once every six hours (at intervals of not less than five hours or no more than seven hours after previous measurement), to include the warmest and the coldest times, during 24-hour period in January or February and in July or August.
(4) The operator of each cable television system shall conduct triennial proof-of-performance tests of that system to determine the extent to which system complies with the technical standards set forth in §76.605(a) (11).

(c) Successful completion of the performance tests required by paragraph (c) of this section does not relieve the system of the obligation to comply with all pertinent technical standards at all subscriber terminals. Additional tests, repeat tests, or tests involving specified subscriber terminals may be required by the Commission or the local franchiser to secure compliance with the technical standards.

(d) The provisions of paragraphs (c) and (d) of this section shall not apply to any cable television system having fewer than 1,000 subscribers: Provided, however, that any cable television system using any frequency spectrum other than that allocated to over-the-air television and FM broadcasting (as described in §73.603 and §73.210) is required to conduct all tests, measurements and monitoring of signal leakage that are required by this subpart. A cable television system operator complying with the monitoring, logging and the leakage repair requirements of §76.614, shall be considered to have met the requirements of this paragraph. However, the leakage log, shall be retained for five years rather than the two years prescribed in §76.614.

Note 1 to §76.601: Prior to requiring any additional testing pursuant to § 76.601(c), the local franchising authority shall notify the cable operator who will be allowed thirty days to come into compliance with any perceived signal quality problems which need to be corrected. The Commission may request cable operators to test their systems at any time.

Note 2 to §76.601: Section 76.1717 contains recordkeeping requirements for each system operator in order to show compliance with the technical rules of this subpart.

Note 3 to §76.601: Section 76.1704 contains recordkeeping requirements for proof of performance tests.

§76.605 Technical Standards.

(a) The following requirements apply to the performance of a cable television system as measured at any subscriber terminal with a matched impedance at the termination point or at the output of the modulating or processing equipment (generally the headend) of the cable television system or otherwise as noted. The requirements are applicable to each NTSC or similar video downstream cable television channel in the system:

(1)(i) The cable television channels delivered to the subscriber's terminal shall be capable of being received and displayed by TV broadcast receivers used for off-the-air reception of TV broadcast signals, as authorized under part 73 of this chapter; and
(ii) Cable television systems shall transmit signals to subscriber premises equipment on frequencies in accordance with the channel allocation plan set forth in CEA-542-B: “Standard: Cable Television Channel Identification Plan,” (Incorporated by reference, see § 76.602).

(2) The aural center frequency of the aural carrier must be 4.5 MHz ±5 kHz above the frequency of the visual carrier at the output of the modulating or processing equipment of a cable television system, and at the subscriber terminal.

(3) The visual signal level, across a terminating impedance which correctly matches the internal impedance of the cable system as viewed from the subscriber terminal, shall not be less than 1 millivolt across an internal impedance of 75 ohms (0 dBmV). Additionally, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, it shall not be less than 1.41 millivolts across an internal impedance of 75 ohms (+3 dBmV). (At other impedance values, the minimum visual signal level, as viewed from the subscriber terminal, shall be the square root of 0.0133 (Z) millivolts and, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, shall be 2 times the square root of 0.00662(Z) millivolts, where Z is the appropriate impedance value.)

(4) The visual signal level on each channel, as measured at the end of a 30 meter cable drop that is connected to the subscriber tap, shall not vary more than 8 decibels within any six-month interval, which must include four tests performed in six-hour increments during a 24-hour period in July or August and during a 24-hour period in January or February, and shall be maintained within:

(i) 3 decibels (dB) of the visual signal level of any visual carrier within a 6 MHz nominal frequency separation;

(ii) 10 dB of the visual signal level on any other channel on a cable television system of up to 300 MHz of cable distribution system upper frequency limit, with a 1 dB increase for each additional 100 MHz of cable distribution system upper frequency limit (e.g., 11 dB for a system at 301-400 MHz; 12 dB for a system at 401-500 MHz, etc .); and

(iii) A maximum level such that signal degradation due to overload in the subscriber's receiver or terminal does not occur.

(5) The rms voltage of the aural signal shall be maintained between 10 and 17 decibels below the associated visual signal level. This requirement must be met both at the subscriber terminal and at the output of the modulating and processing equipment (generally the headend). For subscriber terminals that use equipment which modulate and remodulate the signal (e.g., baseband converters), the rms voltage of the aural signal shall be maintained between 6.5 and 17 decibels below the associated visual signal level at the subscriber terminal.

(6) The amplitude characteristic shall be within a range of ±2 decibels from 0.75 MHz to 5.0 MHz above the lower boundary frequency of the cable television channel, referenced to the average of the highest and lowest amplitudes within these frequency boundaries. The amplitude characteristic shall be measured at the subscriber terminal.
(7) The ratio of RF visual signal level to system noise shall not be less than 43 decibels. For class I cable television channels, the requirements of this section are applicable only to:

(i) Each signal which is delivered by a cable television system to subscribers within the predicted Grade B contour for that signal;

(ii) Each signal which is first picked up within its predicted Grade B contour;

(iii) Each signal that is first received by the cable television system by direct video feed from a TV broadcast station, a low power TV station, or a TV translator station.

(8) The ratio of visual signal level to the rms amplitude of any coherent disturbances such as intermodulation products, second and third order distortions or discrete-frequency interfering signals not operating on proper offset assignments shall be as follows:

(i) The ratio of visual signal level to coherent disturbances shall not be less than 51 decibels for noncoherent channel cable television systems, when measured with modulated carriers and time averaged; and

(ii) The ratio of visual signal level to coherent disturbances which are frequency-coincident with the visual carrier shall not be less than 47 decibels for coherent channel cable systems, when measured with modulated carriers and time averaged.

(9) The terminal isolation provided to each subscriber terminal:

(i) Shall not be less than 18 decibels. In lieu of periodic testing, the cable operator may use specifications provided by the manufacturer for the terminal isolation equipment to meet this standard; and

(ii) Shall be sufficient to prevent reflections caused by open-circuited or short-circuited subscriber terminals from producing visible picture impairments at any other subscriber terminal.

(10) The peak-to-peak variation in visual signal level caused by undesired low frequency disturbances (hum or repetitive transients) generated within the system, or by inadequate low frequency response, shall not exceed 3 percent of the visual signal level. Measurements made on a single channel using a single unmodulated carrier may be used to demonstrate compliance with this parameter at each test location.

(11) As of June 30, 1995, the following requirements apply to the performance of the cable television system as measured at the output of the modulating or processing equipment (generally the headend) of the system:

(i) The chrominance-luminance delay inequality (or chroma delay), which is the change in delay time of the chrominance component of the signal relative to the luminance component, shall be within 170 nanoseconds.
(ii) The differential gain for the color subcarrier of the television signal, which is measured as the difference in amplitude between the largest and smallest segments of the chrominance signal (divided by the largest and expressed in percent), shall not exceed ±20%.

(iii) The differential phase for the color subcarrier of the television signal which is measured as the largest phase difference in degrees between each segment of the chrominance signal and reference segment (the segment at the blanking level of O IRE), shall not exceed ±10 degrees.

(12) As an exception to the general provision requiring measurements to be made at subscriber terminals, and without regard to the type of signals carried by the cable television system, signal leakage from a cable television system shall be measured in accordance with the procedures outlined in § 76.609(h) and shall be limited as follows:

(b) Cable television systems distributing signals by using methods such as nonconventional coaxial cable techniques, noncoaxial copper cable techniques, specialized coaxial cable and fiber optical cable hybridization techniques or specialized compression techniques or specialized receiving devices, and which, because of their basic design, cannot comply with one or more of the technical standards set forth in paragraph (a) of this section, may be permitted to operate: Provided, That an adequate showing is made pursuant to § 76.7 which establishes that the public interest is benefited. In such instances, the Commission may prescribe special technical requirements to ensure that subscribers to such systems are provided with an equivalent level of good quality service.

NOTE 1: Local franchising authorities of systems serving fewer than 1000 subscribers may adopt standards less stringent than those in § 76.605(a). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

NOTE 2: For systems serving rural areas as defined in § 76.5, the system may negotiate with its local franchising authority for standards less stringent than those in §§ 76.605(a)(3), 76.605(a)(7), 76.605(a)(8), 76.605(a)(10) and 76.605(a)(11). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

NOTE 3: The requirements of this section shall not apply to devices subject to the TV interface device rules under part 15 of this chapter.

NOTE 4: Should subscriber complaints arise from a system failing to meet § 76.605(a)(6) prior to December 30, 1999, the cable operator will be required to provide a converter that will allow the system to meet the standard immediately at the complaining subscriber's terminal.
Further, should the problem be found to be system-wide, the Commission may order all converters on the system be changed to meet the standard.

**NOTE 5:** Should subscriber complaints arise from a system failing to meet § 76.605(a)(10), the cable operator will be required to remedy the complaint and perform test measurements on § 76.605(a)(10) containing the full number of channels as indicated in § 76.601(b)(2) at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order that the full number of channels as indicated in § 76.601(b)(2) be tested at all required locations for future proof-of-performance tests.

**NOTE 6:** No State or franchising authority may prohibit, condition, or restrict a cable system's use of any type of subscriber equipment or any transmission technology.

§76.606 Closed Captioning.

(a) The requirements for closed captioning are as follows:

(i) As of [90 days following publication in the Federal Register], the operator of each cable television system shall not take any action to remove alter closed captioning data contained on line 21 of the vertical blanking interval; and

(ii) As of July 1, 1993, the operator of each cable television system shall deliver intact closed captioning data contained on line 21 of the vertical blanking interval, as it arrives at the headend or from another origination source, to subscriber terminals and (when so delivered to the cable system) a format that can be recovered and displayed by decoders meeting § 15.119 of the Rules.

§76.1713 Complaint Resolution.

Cable system operators shall establish a process for resolving complaints from subscribers about the quality of the television signal delivered. Aggregate data based upon these complaints shall be made available for inspection by the Commission and franchising authorities, upon request. These records shall be maintained for at least a one-year period.

**NOTE 1 TO §76.1713:** Prior to being referred to the Commission, complaints from subscribers about the quality of the television signal delivered must be referred to the local franchising authority and the cable system operator.

CABLE SYSTEM SPECIFICATIONS, continued:

Stereo Pass-Through:
The Cable System shall be capable of cablecasting all Signals transmitted in stereo (NTSC format).

(2) A copy of the cable television operator’s billing practices notice, work order and sample subscriber bill shall be filed by March 15th of each year with the Commission, the issuing authority, and the company’s local office, where they shall be available for public inspection. If an operator amends its billing practices notice, work order or subscriber bill after submitting the annual filing, it shall file copies of the amendments with the Commission, the issuing authority and the company’s local office.

(3) At least 30 days prior to implementing a change of one of its billing practices, the cable television operator shall notify in writing the Commission, the issuing authority and all affected subscribers of the change and include a description of the changed practice.

(4) Statements about billing practices in work orders, marketing, materials and other documents shall be consistent with the billing practices notice.

10.02 Services Rates and Charges Notice

(1) The cable television operator shall give notice of its services, rates and charges to potential subscribers before a subscription agreement is reached.

(2) At least 30 days prior to implementing an increase in one of its rates or charges or a substantial change in the number or type of programming services, the operator shall notify, in writing, the Commission, the issuing authority and all affected subscribers of the change and include a description of the increased rate or charge. The notice shall list
the old and new rate or charge and, if applicable, the old and new programming services provided.

(3) Every cable television operator shall fully disclose in writing all of its programming services and rates, upon request from a subscriber.

(4) Every cable television operator shall fully disclose in writing all of its charges for installation, disconnection, downgrades and upgrades, reconnection, additional outlets, and rental, purchase and/or replacement due to damage or theft of equipment or devices used in relation to cable services, upon request from a subscriber.

(5) Every cable television operator shall fully disclose in writing all of its charges for installation, disconnection, downgrades and upgrades, reconnection, additional outlets, and rental, purchase and/or replacement due to damage or theft of equipment or devices used in relation to cable services, upon request from a subscriber.

(6) Every cable television operator shall fully disclose in writing all of its charges for installation, disconnection, downgrades and upgrades, reconnection, additional outlets, and rental, purchase and/or replacement due to damage or theft of equipment or devices used in relation to cable services, upon request from a subscriber.

(7) Every cable television operator shall fully disclose in writing all of its charges for installation, disconnection, downgrades and upgrades, reconnection, additional outlets, and rental, purchase and/or replacement due to damage or theft of equipment or devices used in relation to cable services, upon request from a subscriber.

10.03 Form of Bill

(1) The bill shall contain the following information in clear, concise and understandable language and format:

(a) the name, local address and telephone number of the cable television operator. The telephone number shall be displayed in a conspicuous location on the bill and shall be accompanied by a statement that the subscriber may call this number with any questions or complaints about the bill and or subscribers rights under 207 CMR 10.07 in the event of a billing dispute;
(b) the period of time over which each chargeable service is billed including prorated periods as a result of establishment and termination of service;
(c) the dates on which individually chargeable services were rendered or any applicable credits were applied;
(d) separate itemization of each rate or charge levied or credit applied, including but not be limited to basic, premium service and equipment charges, as well as any unit, pay-per-view or per item charges;
(e) the amount of the bill for the current billing period, separate from any prior balance due,
(f) the date on which payment is due from the subscriber.

(2) Cable operators may identify as a separate line item of each regular subscriber bill the following:

   (a) The amount of the total bill assessed as a franchise fee and the identity of the franchising authority to whom the fee is paid;
   (b) The amount of the total bill assessed to satisfy any requirements imposed on the cable operator by the franchise agreement to support public, educational, or governmental channels or the use of such channels;
   (c) The amount of any other fee, tax, assessment, or charge of any kind imposed by any governmental authority on the transaction between the operator and the subscriber. In order for a governmental fee or assessment to be separately identified under 207 CMR 10.03, it must be directly imposed by a governmental body on a transaction between a subscriber and an operator.

(3) All itemized costs shall be direct and verifiable. Each cable operator shall maintain a document in its public file which shall be available upon request, that provides the accounting justification for all itemized costs appearing on the bill.

10.04 Advance Billing and Issuance of Bill

   (1) In the absence of a license provision further limiting the period of advance billing, a cable operator may, under uniform nondiscriminatory terms and conditions, require payment not more than two months prior to the last day of a service period.

   (2) A cable subscriber may voluntarily offer and a cable operator may accept advance payments for periods greater than two months.

   (3) Upon request, a cable television operator shall provide subscribers with a written statement of account for each billing period and a final bill at the time of disconnection.

10.05 Billing Due Dates, Delinquency, Late Charges and Termination of Service

   (1) Subscriber payment is due on the date marked on the bill, which shall be a date certain and in no case a statement that the bill is due upon receipt. The due date shall not be less than five business days following the mailing date of the bill.

   (2) A subscriber account shall not be considered delinquent unless payment has received by the company at least 30 days after the bill due date.

   (3) The following provisions shall apply to the imposition of late charges on subscribers

       (a) A cable television operator shall not impose a late charge on a subscriber unless a subscriber is delinquent, the operator has given the subscriber a written late charge notice in a clear and conspicuous manner, and the subscriber has been
given at least eight business days from the date of delinquency to pay the balance due.

   (b) A charge of not more than 5% of the balance due may be imposed as a one-time late charge.
   (c) No late charge may be assessed on the amount of a bill in dispute.

(4) A cable television operator shall not terminate a subscriber’s service unless the subscriber is delinquent the cable operator has given the subscriber a separate written notice of termination in a clear and conspicuous manner, and the subscriber has been given at least eight business days from the mailing of the notice of termination to pay the balance due. A notice of termination shall not be mailed to subscribers until after the date of delinquency.

(5) A cable television operator shall not assess a late charge on a bill or discontinue a subscriber’s cable television service solely because of the nonpayment of the disputed portion of a bill during the period established by 207 CMR 10.07 for registration of a complaint with the operator or during the process of a dispute resolution mechanism recognized under 207 CMR 10.07.

(6) Any charge for returned checks shall be reasonably related to the costs incurred by the cable company in processing such checks.

10.06 Charges for Disconnection or Downgrading of Service

(1) A cable television operator may impose a charge reasonably related to the cost incurred for a downgrade of service, except that no such charge may be imposed when:

   (a) A subscriber requests total disconnection from cable service; or
   (b) A subscriber requests the downgrade within the 30 day period following the notice of a rate increase or a substantial change in the number or type of programming services relative to the service(s) in question.

(2) If a subscriber requests disconnection from cable television service prior to the effective date of an increase in rates, the subscriber shall not be charged the increased rate if the cable television operator fails to disconnect service prior to the effective date. Any subscriber who has paid in advance for the next billing period and who requests disconnection from service shall receive a prorated refund of any amounts paid in advance.

10.07 Billing Disputes

(1) Every cable television operator shall establish procedures for prompt investigation of any billing dispute registered by a subscriber. The procedure shall provide at least 30 days from the due date of the bill for the subscriber to register a complaint. The cable television operator shall notify the subscriber of the result of its investigation and give an explanation for its decision within 30 working days of receipt of the complaint.
(2) The subscriber shall forfeit any rights under 207 CMR 10.07 if he or she fails to pay the undisputed balance within 30 days.

(3) Any subscriber in disagreement with the results of the cable television operator’s investigation shall promptly inquire about and take advantage of any complaint resolution mechanism, formal or informal, available under the license or through the issuing authority before the Commission may accept a petition filed under 207 CMR 10.07(4).

(4) The subscriber or the cable television operator may petition the Commission to resolve disputed matters within 30 days of any final action. Final action under 207 CMR 10.07(3) shall be deemed to have occurred 30 days after the filing of a complaint.

(5) Upon receipt of a petition, the Commission may proceed to resolve the dispute if all parties agree to submit the dispute to the Commission and be bound by the Commission’s decision and the Commission obtains a statement signed by the parties indicating that agreement. In resolving the dispute the Commission may receive either written or oral statements from the parties and may conduct its own investigation. The Commission shall then issue a decision based on the record and the parties shall receive written notification of the decision and a statement of reasons therefor.

10.08 Security Deposits

(1) A cable operator shall not require from any cable subscriber a security deposit for converters or other equipment in excess of the cost of the equipment.

(2) The cable operator shall pay interest to the cable subscriber at a rate of 7% per year for any deposit held for six months or more, and such interest shall accrue from the date the deposit is made by the cable subscriber. Interest shall be paid annually by the cable operator to the cable subscriber, either as a direct payment or as a credit to the cable subscriber’s account.

(3) Within 30 days after the return of the converter or other equipment, the cable operator shall return the security deposit plus any accrued interest to the cable subscriber, either as a direct payment or as a credit to the cable subscriber’s account.

REGULATORY AUTHORITY

EXHIBIT 11

FCC CUSTOMER SERVICE OBLIGATIONS

§76.309 Customer service obligations.

(a) A cable franchise authority may enforce the customer service standards set forth in paragraph (c) of this section against cable operators. The franchise authority must provide affected cable operators ninety (90) days written notice of its intent to enforce the standards.

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any state or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any state or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(1) Cable system office hours and telephone availability —
