Supplemental Questions for:
Wireless Communications Facilities

13. Wireless Communications Facility Supporting Statements
Address each of the following items in order to apply for a SP for a wireless communications facility.
A. Explain the following: (i) description of the proposed equipment and mountings; (ii) technical, economic, and other reasons for the proposed location, height, and design; (iii) confirmation that the facility complies with all applicable Federal and State standards; and (iv) description of the capacity of the facility, including the number and type of panels, antennas and/or transmitter receivers that it can accommodate and the basis for these calculations.
B. A map and list describing all of the Applicant's current and expected future sites for telecommunications facilities in the City.
C. For new sites show evidence of the following: (i) no existing sites are located within the required geographic area; (ii) existing sites are not of sufficient height; (iii) existing sites do not have sufficient structural strength to support the necessary antenna and related equipment; (iv) the Applicant's proposed antenna would cause electromagnetic interference with existing antennas on the site, or the existing antennas on the site would cause interference with the Applicant's proposed antennas; or (v) the Applicant demonstrates that there are other limiting factors that render existing sites or alternative technologies unsuitable.
